Subject: Wailuku Civic Complex

I am not against the Civic Center and at some point in time it might be a nice project to do if it is something that will be used to the point of equaling the cost of its construction. But there are much more important and necessary projects around the county right now that needs the attention of the County Council and the funds that would be spent on the Civic Center Complex. The roads for one are definitely in need of better funding. They are in very poor condition in many places around the county and this is something we drive on every day. How can the county say they have \$80 million to spend on the Civic Center project and then say they don't have the money to fix the roads when the Civic Center isn't a necessity but the roads that should be in good drivable condition are. The roads have a safety factor to them and there has been enough accidents because of their condition that it should be easy to see the need for them to be in proper working order. They are also causing damage to our cars which shouldn't be an expense for the residents to incur.

So please take the due diligence to prioritizing the funds that are available and then creating a budget that takes care of the needs first.

Thank You
Steven Forman
