Resolution

No. 23-163, CD1

REFERRING TO THE LĀNAʻI, MAUI, AND
MOLOKAI PLANNING COMMISSIONS A
PROPOSED BILL ON ELECTRIC VEHICLE
PARKING

WHEREAS, the Council is considering a proposed bill to support the expansion of dedicated parking spaces for electric vehicles; and

WHEREAS, Sections 8-8.4 and 8-8.6 of the Revised Charter of the County of Maui (1983), as amended, require that the appropriate planning commission review proposed zoning and other land use ordinances, and provide findings and recommendations to the Council; now, therefore,

BE IT RESOLVED by the Council of the County of Maui:

1. That it refers the proposed bill, entitled “A BILL FOR AN ORDINANCE AMENDING SECTION 19.36B.020, MAUI COUNTY CODE, ON ELECTRIC VEHICLE PARKING,” attached as Exhibit “1,” to the Lānaʻi Planning Commission, Maui Planning Commission, and Molokai Planning Commission for appropriate action under Sections 8-8.4 and 8-8.6 of the Revised Charter of the County of Maui (1983), as amended; and
2. That certified copies of this Resolution be transmitted to the Mayor, Planning Director, Lānaʻi Planning Commission, Maui Planning Commission, and Molokai Planning Commission.

EXHIBIT “1”

ORDINANCE NO. _____

BILL NO. _____ (2025)

A BILL FOR AN ORDINANCE AMENDING SECTION 19.36B.020, MAUI
COUNTY CODE, ON ELECTRIC VEHICLE PARKING

BE IT ORDAINED BY THE PEOPLE OF THE COUNTY OF MAUI:

SECTION 1. Section 291-71, Hawai‘i Revised Statutes, requires places of public accommodation with at least 100 parking spaces available for use by the general public to have at least one parking space equipped with an electric vehicle charging system. To promote the use of electric vehicles in the State, the Council finds that the buildout of adequate electric vehicle parking spaces is critical.

The Council further finds that the increased adoption of electric vehicles plays a key role in achieving Hawai‘i’s commitment to sequester more atmospheric carbon and greenhouse gases than emitted within the State by 2045, as noted under Section 225P-5, Hawai‘i Revised Statutes. Further, the Governor issued Executive Order 25-01, reinforcing Hawai‘i’s commitment to target a zero-emissions clean economy by accelerating the transition to 100-percent renewable electricity production in Hawai‘i, Kaua‘i, and Maui counties by 2035. In addition, the Countywide Policy Plan directs the County to “[e]ncourage the use of sustainable energy to power vehicles.”

This Ordinance’s purpose is to require new places of public accommodation with at least 50 parking spaces to have at least two parking

spaces designated for electric vehicles equipped with an electric vehicle charging system and to require an additional two parking spaces designated for electric vehicles equipped with an electric vehicle charging system for each additional increment of 50 parking spaces. This Ordinance also provides that any conflict with Title 16's Energy Code will be resolved in favor of the stricter provision.

SECTION 2. Section 19.36B.020, Maui County Code, is amended to read as follows:

“19.36B.020 Designated number of off-street parking spaces. A. Unless otherwise provided in this chapter, the following minimum numbers of accessible, onsite, off-street facilities for the parking of self-propelled motor vehicles [shall] must be provided in connection with the use of any land or the construction, alteration, or improvement of any building or structure.

B. When reviewing a building permit application or proposed change of use, the department [shall] must determine whether the applicant must submit a parking and landscaping plan to [establish compliance] comply with this chapter. If the department requires a plan, the department will not recommend approval of a building permit application or proposed change of use until it approves the plan and will not approve a certificate of occupancy or final inspection until the applicant has implemented the approved plan.

C. The number of required parking spaces [shall] must be based on the floor area of each use or component use except where otherwise specified. When calculating the total number of required parking spaces, a fraction less than one-half [shall] must be disregarded, and a fraction of one-half or more [shall require] requires one parking space. [The following chart establishes the general requirements for accessible, onsite, off-street parking.]

D. Compliance with the Americans with Disabilities Act, administered through the State department of health, disability and communications access board, [and with State requirements for electric-vehicle parking] is [also] required. Compliance with State requirements for electric-vehicle parking is also required, except that newly constructed places of public accommodation outside of the erosion hazard line with at least 50 parking spaces are subject to the following minimum requirements:

1. At least two parking spaces must be designated for electric vehicles and be equipped with an electric vehicle charging system.

2. For each additional increment of 50 parking spaces, at least two additional parking spaces must be designated for electric vehicles and be equipped with an electric vehicle charging system.

3. Electric vehicle charging systems must be in working order.

For this subsection's purposes, "electric vehicle charging system" has the same meaning as in section 291-71, Hawai'i Revised Statutes; "place of public accommodation" has the same meaning as in section 489-2, Hawai'i Revised Statutes.

If any of this subsection's requirements conflict with the requirements under title 16's energy code, the stricter requirement prevails.

E. The following table establishes the general and minimum requirements for accessible, onsite, and off-street parking.
