Dear Maui County GET Committee,

Hi, my name is Kalani Fukumoto and I live in Kailua, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

take care of the AINA.  
check out the hotels in WAIKIKI too.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Aloha Alice Lee,

My name is Natalie Gonder, I am writing you out of concern for Mother Earth and all she provides us with. It is OUR responsibility as human beings to take responsibility for what we have done. It's time we protect and preserve the world's oceans for all to enjoy. As a local who grew up in Lahaina and went to school at Kamehameha III, I encourage you to make not the easy decision but the right one for our keiki and future generations to come. It is an opportunity of a lifetime to set the tone for the rest of time. Let's stand up together and create NEW effective solutions for a more eco friendly island and world. We have run out of time and need take massive action in a new direction.

I URGE YOU to SETTLE this case regarding the Lahaina Injection Wells and partner up with local organizations who have been putting their blood, sweat, and tears into more effective solutions.

Mahalo for your time. I love you!

**Subject:** re: GET-26 CC 19-178

Aloha Council member Lee,

I am writing to strongly urge you and the council to settle the Lahaina Injection wells case. The case is clear: water from injection wells is seeping into the coral reefs and causing damage. While the cost of changing how the county handles the treated waste water may be high, the cost to the county in the loss of tourism revenue will be much worse and much longer lasting if we kill off our reefs and fish that draw visitors from around the world.

While I personally view this case as a simple moral issue - we should not be polluting our oceans because it's more convenient than doing the right thing - think about it as a financial issue with decades of repercussions.

Please vote to settle.

Mahalo,  
Mike Luque

**Subject:** Deakos testimony in favor of settling the West Maui injection well case

Honorable Members of the Governance, Ethics, and Transparency Committee,

“We Do Not Inherit the Earth from Our Ancestors; We Borrow It from Our Children”

On our final day, when we reflect back on our lives, only one question will matter, “Did I do what is best for the future of our keiki?” As we spend our final moments with our grand-children and we reflect on our life, it won’t be our financial or political achievements that define our legacy, it will be whether or not our actions prepared our keiki for best future they could have.

What we all witnessed on Tuesday, September 3, was Maui at its best. An outpouring of testifiers providing innovative solutions to a 5M gallon a day LIABILITY impacting our reefs by turning this into a 5M gallon a day ASSET to help address West Maui water needs including irrigation, agriculture, and stream flow restoration. Using all the excess solar energy that MECO is unable to accept onto its grid during peak production can be used to pump water uphill can even create a pumped hydroelectric energy storage (PHES) battery ([https://en.wikipedia.org/wiki/Pumped-storage\\_hydroelectricity](https://en.wikipedia.org/wiki/Pumped-storage_hydroelectricity)). We also got clarification from attorneys and the Department of Health that homes on septic systems are well protected, and that NPDES permits for injections wells already exist in other states and will provide guidance for the transition here on Maui.

When we work together we can solve Maui’s greatest problems and create a better future for our keiki.

Today, please show the nation that the people of Maui that will decide our own fate and the future of our keiki, not the Supreme Court.

Let’s be on the right side of history, let’s make our keiki proud!

Mark Deakos

Mr. Imada,

The vote is tomorrow in committee re: injection wells proposed resolutions. This video was just produced and is being sent out to thousands of people through social media via concerned citizens, and will begin airing shortly on Akaku.

This issue of this case is now of National and International importance and will significantly impact these Hawaiian Islands for years to come.

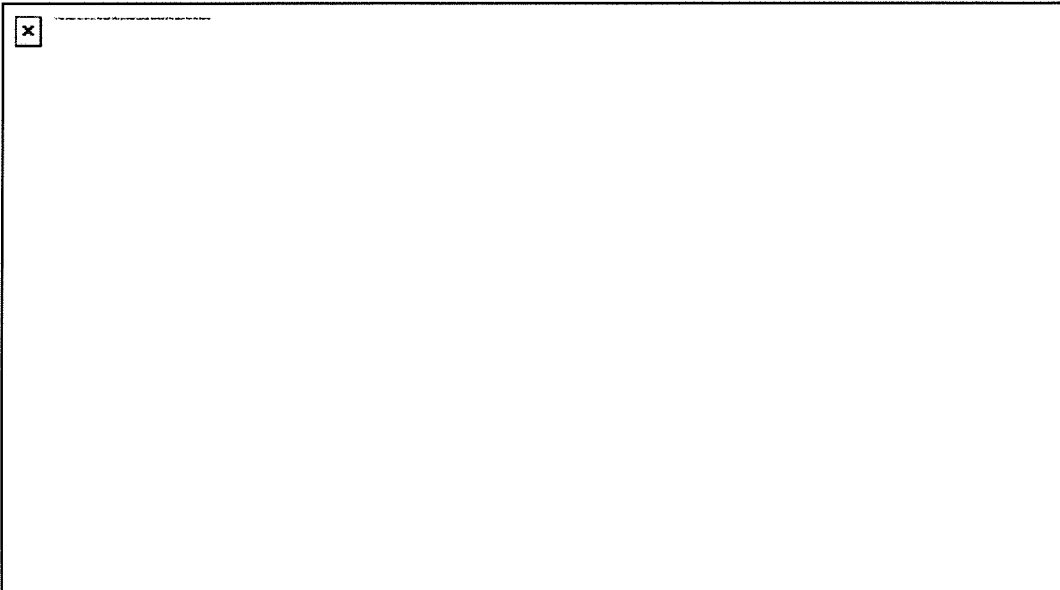

I just wish to keep you informed.

The wall(s) keeping the corruption at bay in our County government are beginning to show fissures. The cracks are spreading. The light is breaking through the darkness.

*Sent from my Sprint Phone.*

The Open Secret of Corruption - Injection Well case is only one example of manipulations.

Watch Maui Real News Episode 4: <https://mauicauses.org/maui-real-news-show-4/>

Mayor Victorino and Corporation Counsel acknowledge that have teamed up with the Trump Administration to gut the Clean Water Act by appealing Maui's Injection Well case to the U.S. Supreme Court. The Trump stacked court is predisposed to deregulating environmental and water protections Nationwide on behalf of the Fracking, coal and big business polluters.

How can the Maui County Council even consider voting to desecrate the values which bring hundreds of thousands of visitors to these Hawaiian Islands, the very blood of the A'ina; the very Life of the Land which can only be perpetuated in Righteousness.

There were those of us who believed Mayor Victorino's promise to clean up the corruption he is very aware of, in Corp Counsel, Planning, and Public Works. But the Mayor hasn't kept his word. He has caved to the corruption within his own administration.

The Mayor sent a settlement offer with secret terms to the Council to be heard in Executive Session. Mr. Mayor, People only do things in the dark, when they have something to hide.

All the Trumped-up fear-mongering concerns over private sanitation systems and insurmountable uncertainty and paperwork going forward were effectively debunked by experts in council testimony. There's absolutely no need for Maui County to do this.

Do Maui County Council Members really want to be responsible for causing environmental destruction Nationwide by going forth with this appeal to the Supreme Court? Let's take responsibility for our own kuliana and prevent further harm to the A'ina on Maui and elsewhere.

Aloha Alice,

I URGE YOU to SETTLE this case regarding the Lahaina Injection Wells and partner up with local organizations who have been putting their blood, sweat, and tears into more effective solutions.

I believe that clean water is both a necessity and basic human right. Water is the main defining feature of Maui. The beaches, turtles, reefs, and whales all depend on having clean water. It will always be easier and cheaper to dump our waste into the ocean short term, but the **long term costs** of having pollution in our oceans are unimaginable... **The loss of our sea life & humans getting sick from entering the ocean.**

Many organizations, including Surfrider Foundation, test the ocean water around Maui regularly and have proven that the Lahaina Injection Wells are contaminating Maui's beaches. Please consider how valuable clean beaches and oceans are, not just to tourists, but to every resident of Maui.

Mahalo for your time. I love you & I believe in you!

Subject: Please Settle the Lahaina Injection Wells Lawsuit

Dear Ms. Kelly T. King,

For over a decade, Maui County has fought to allow the Lahaina Wastewater Reclamation Facility to keep polluting the Kahekili reef. The Surfrider Foundation Maui Chapter and our coalition partners have tried to work with the former Mayor to find practical alternatives. We believe the Wastewater Facility can redirect its effluent to provide needed water for golf courses, commercial landscaping, and agriculture. Instead of working with us, the County has spent over \$4 million in taxpayer money on mainland law firms to appeal each decision lost. As the current leaders of Maui County, you have the opportunity to turn this around. Please do the responsible thing for Maui County and protect our reputation and our reefs. We should use our time, energy and taxpayer dollars to fix the problem, not fight the solution.

If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Sincerely,

Mrs. Marion Freet

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want to people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Sincerely,

Subject: Please Settle the Lahaina Injection Wells Lawsuit

Dear Ms. Kelly T. King,

For over a decade, Maui County has fought to allow the Lahaina Wastewater Reclamation Facility to keep polluting the Kahekili reef. The Surfrider Foundation Maui Chapter and our coalition partners have tried to work with the former Mayor to find practical alternatives. We believe the Wastewater Facility can redirect its effluent to provide needed water for golf courses, commercial landscaping, and agriculture. Instead of working with us, the County has spent over \$4 million in taxpayer money on mainland law firms to appeal each decision lost. As the current leaders of Maui County, you have the opportunity to turn this around. Please do the responsible thing for Maui County and protect our reputation and our reefs. We should use our time, energy and taxpayer dollars to fix the problem, not fight the solution.

If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Sincerely,

Ms. Donna Brown

Dear Ms. Kelly T. King,

For over a decade, Maui County has fought to allow the Lahaina Wastewater Reclamation Facility to keep polluting the Kahekili reef. The Surfrider Foundation Maui Chapter and our coalition partners have tried to work with the former Mayor to find practical alternatives. We believe the Wastewater Facility can redirect its effluent to provide needed water for golf courses, commercial landscaping, and agriculture. Instead of working with us, the County has spent over \$4 million in taxpayer money on mainland law firms to appeal each decision lost. As the current leaders of Maui County, you have the opportunity to turn this around. Please do the responsible thing for Maui County and protect our reputation and our reefs. We should use our time, energy and taxpayer dollars to fix the problem, not fight the solution.

If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want to people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Dear Ms. Kelly T. King,

I grew up on Maui - snorkeling and swimming. I can see the difference in the reefs with my eyes. The coral colors and fish are less and less. Please help us keep the water clear for our keiki.

Sincerely,

**Subject:** Testimony in SUPPORT of resolution CC-19-178 re: settling the Lahaina Injection Wells lawsuit

Dear Maui County GET Committee,

My name is \_\_\_\_\_ and I am a resident of \_\_\_\_\_. I care about this issue because \_\_\_\_\_.

I am writing in support of Maui County settling the Lahaina Injection Well case (HAWAII WILDLIFE FUND, ET AL. V. COUNTY OF MAUI, RELATING TO THE CLEAN WATER ACT).

Both the Hawai'i district court and Ninth Circuit appeals court have already ruled that the County must get a permit under the Clean Water Act to continue discharging treated wastewater into the groundwater via the Lahaina injection wells. I ask the County to withdraw its appeal and work with state and community stakeholders to modernize the treatment facility and invest in water reuse solutions.

Settling the case would end a detrimental challenge against the Clean Water Act and allow the County to avoid further penalties as long as it diligently works toward solutions. The Department of Health has already made clear that private cesspools and septic tanks would not need to get NPDES permits, so there is no risk to individual homeowners.

However, if the County continues its appeal, it threatens to gut the federal Clean Water Act. If the County wins the case at the Supreme Court, polluters across the United States would be free to contaminate water bodies as long as they release their waste from a pipe just short of the waters' edge or into the ground. The Trump Administration and industrial polluters like pipeline companies, the oil and gas industry, manufacturers, coal-burning utilities, and mining associations are all hoping that you will continue the appeal. As elected officials, I hope you will do the right thing, not for the Trump Administration and industrial polluters, but for public trust waters and present and future generations in Maui and all of Hawai'i.

Maui County has a history of being leaders in environmental protection, and you can uphold this reputation and continue this legacy by withdrawing the appeal. Please help to uphold the Clean Water Act and protect Maui's reefs, which not only provide many economic benefits, but hold cultural and environmental significance for all of Hawai'i. I ask you to support the settlement of the Lahaina Injection Wells case and withdrawal of the appeal.

Sincerely,  
Joseph Kohn MD

Subject: Please Settle the Lahaina Injection Wells Lawsuit

Dear Ms. Kelly T. King,

For over a decade, Maui County has fought to allow the Lahaina Wastewater Reclamation Facility to keep polluting the Kahekili reef. The Surfrider Foundation Maui Chapter and our coalition partners have tried to work with the former Mayor to find practical alternatives. We believe the Wastewater Facility can redirect its effluent to provide needed water for golf courses, commercial landscaping, and agriculture. Instead of working with us, the County has spent over \$4 million in taxpayer money on mainland law firms to appeal each decision lost. As the current leaders of Maui County, you have the opportunity to turn this around. Please do the responsible thing for Maui County and protect our reputation and our reefs. We should use our time, energy and taxpayer dollars to fix the problem, not fight the solution.

If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want to people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Sincerely,

Mrs. Shannon Welander

Good Morning Tamara, and Kelly -

In regards to the attached e-mail. Myself getting a goon now, and then also - Being very direct - many can't read between the lines. Our motivation in the background is for going on to the US Supreme Court. This having more to do with respect for the court system. Reinforcing whats been done. Win or lose - We can see whats happening in regards TMT, and the Hawaii Supreme Courts ruling on that - Loss of respect for the courts? Nothing wrong with protesting - As long as they hold the line.

Morning to all -

In regards to the above subject line in a letter to the editor from Rob Weltman - Maui Group  
Chair - Sierra Club of Hawaii.

It is our contention here from day one; with e-mails to Maui County Chair Kelly King: that in fact  
County of Maui should pursue threw the courts; to include the US Supreme Court the Lahaina  
Injection Wells. We here believe there has been much confusion with the media's climate failure.  
To the point making many wonder who is writing this legislation. Case in point - There is  
argument with many failures between the Environmental Perfection Agency, and the Clean  
Waters Act. Which does have a legal grounds for argument in which County of Maui should in  
fact follow threw with. Questions need to be asked, and answers threw the courts. For a much  
better understanding -

With kind regards for Rob Weltman; your train of thought falls into the area of good bye to the  
earth as we know it. Maybe reading to many of Earth Justices News letters - For those following  
this know our story with that.

Dear Ms. Kelly T. King,

I grew up in Lahaina snorkeling and I can see a difference in the reefs over my lifetime. HELP!  
Our keiki are scared.  
If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want to people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Sincerely,
