Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Subject: Stop Giant 4G/5G Drones Until Health & Environment Effects Are Studied

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BiolInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GspaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Subject: Stop Giant 4G/5G Drones Until Health & Environment Effects Are Studied

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GspaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BiolInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BiolInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.
