Aloha council members

I am in total support of allowing Wailea 670 / Honua'ula to build affordable housing on site. I wish they had been allowed to build at the north Kihei site because we would have a lot of local working people renting and owning homes today, right now.

Thank you for hearing this issue and PLEASE approve it so we have more affordable houses in the pipeline. This developer committed to build affordable first. The KCC oppision and SLU commission prevented them from doing so. The upcountry road intersection being paid for by the developer has also been delayed due to their oppision.
