by adding an appropriation of \$2,200,000 under the Department of Public Works, Wailuku-Kahului Community Plan Area, for the Kahului Drainline Repairs project.

Your Committee notes by County Communication 17-415, the Budget Director transmitted three proposed bills to amend the Fiscal Year 2018 Budget, general obligation bond authorization ordinance, and Appendix C, for drainline repairs in Kahului, Waiehu, and South Maui.

At the request of the Chair of your Committee, the Budget Director transmitted revised proposed bills separating the projects by district: Kahului, Waiehu, and South Maui. Your Committee completed its review of the proposed bills for Kahului drainline repairs. Your Committee may discuss the proposed bills relating to the Waiehu and the South Maui drainline repairs at a later date.

The Director of Public Works said drainline repairs are needed in various locations in Kahului. The current drainage pipes, made of corrugated metal, are near the end of its useful life of 30 to 50 years. The drainage pipes have deteriorated so severely resulting in sinkholes and creating dangerous situations on the roadways. He said metal plates are used to cover the area until repairs can be made.

The Director said about six sinkholes occur annually throughout the County. The Department incorporates a lining to prolong the life of old drainlines when feasible. He said the pipes that are now used for drainlines are made of high-density polyethylene, with a useful life of more than 100 years.

The Director said \$700,000 was appropriated in the Fiscal Year 2018 Budget for Central Maui Drainline Repairs. He said the Department has used those funds to initiate design and topography for various projects in Kahului. With a combination of the current appropriation and the proposed funding, the Department will be able to complete the much needed drainline repairs.

The Director informed your Committee the repairs are not related to the County's Small Municipal Storm Water Management (MS4) Program. Your Committee notes MS4 is defined by the United States Environmental Protection Agency as a conveyance, or system of conveyances, designed to collect or move storm water off the land. MS4 components may include municipal streets, catch basins, curbs, gutters, ditches, or storm drains.

Your Committee voted 5-0 to recommend passage of the revised proposed bills on first reading. Committee Chair Hokama, Vice-Chair White, and members Atay, Crivello and Sugimura voted "aye." Committee members Carroll, Cochran, Guzman, and King were excused.

Your Budget and Finance Committee RECOMMENDS the following:

1.
