Aloha Rob,

Unfortunately I will not be able to attend the Council meeting this afternoon due to a previous commitment I have to attend today and Troy is out sick. Fortunately Troy put together an estimate for the Ka'ae road project. I believe you will focus on the material estimate and not the labor force cost. This should be a 2 day project, starting with prep and fill, then ending with Slurry treatment the following day. Attached is the work order estimate for Ka'ae project. If you have any other concerns, I will be available until 1pm.

Thanks Gary
