Subject: 201H fast track status for the "Makila Farms" housing development

Dear Affordable Housing Committee,

I am writing to voice opposition to the Makila Farms housing development. I oppose changing the zoning on these lands for several reasons. First, there are significant risks involved in exiting the Launiupoko area during fire and other emergencies. There are very few exit routes and changing the zoning increases the number of individuals who would need to evacuate during an emergency. In the event of fire, firefighters would be called upon to save additional properties if the zoning is changed. Second, I understand that Greg Brown wants to drill additional wells for potable water. My concern with this is the impact on the freshwater lens in West Maui. Have studies been done to determine impacts of higher-density development on the freshwater lens?

Thanks for allowing me to voice my concerns with this project.

Sincerely,

Michele Moore
Makila Plantation Lot 19 and 205 Pua Niu Way, Launiupoko
