Dear Councilmember Alice Lee,

Hi, my name is Christopher Nakahashi and I live in Haiku-pauwela, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Regards,
Christopher Nakahashi

Subject: Save the Clean Water Act

To whom it may concern:

I am writing in strong support that Maui County accept the lower court's ruling and drop its appeal to the US Supreme Court with regards to the injection wells on the West Side. I, like many people who live on Maui, am proud of our Valley Isle. It would be mortifying to be the island that takes down the Clean Water Act. We are living in troubling times with the current administration not filling necessary positions (think FEC, EPA, etc.), thereby eliminating any real oversight. The Clean Water Act is necessary to our nation and its waterway systems, and we should not be cavalier about its goals.

Please, do the right thing. Accept the lower court's ruling and stop the appeal to the US Supreme Court.

Mahalo for taking the time to read my testimony.

To: GET Committee
Subject: Lahaina Discharge

Dear Chairman Molina and Committee Members:

I urge you to withdraw the Lahaina discharge case and settle it before it is heard by the U. S. Supreme Court. Although this case has been a topic of major interest on Maui for quite some time, it has drawn relatively little interest outside of Hawai`i. Once it is heard by the Court, and if Maui prevails, it will place a very negative stigma on Maui. The mainland headlines will scream things like "Maui wins right to continue dumping sewage into ocean." This is not the kind of publicity that Maui wants or needs.

The harmful precedent that could be set will also reflect very badly on Maui. The island and its elected leaders will be cast as environmental pariahs. This will definitely affect Maui tourism, Maui jobs, and island economic well-being.

I urge you to settle this case and avoid the publicity of a Supreme Court case.

To: GET Committee
Subject: 9/3/19 Agenda

For your 9/3/19 meeting:

Aloha Chair and members,

Regarding the recent report of an EPA assistant administrator saying "homeowner backyard septic systems" could require NPDES permits if the county loses the Lahaina wastewater case appeal:

To put things in more simple language, if someone has a septic or cesspool on the beach, or a stream, yes, they could and should be cited for pollution. That is already the law.

However, backyard septic systems would not come under NPDES and Clean Water Act unless they were getting into "streams and rivers, wetlands, and coastal and marine waters". If by poor location they were, it would be a GOOD thing to regulate them.

It would take a rather large, leaky sewage system that was away from the beach or waters to have some impact. With the the Lahaina system, it is the injection wells that are causing leakage to the ocean.

The water being injected into the wells is safe and can be used for irrigation and agriculture under the Underground Injection and Safe Drinking Water standards. This water could be very welcome on ag lands by updating distribution systems.

The problem with that same water getting to the waters is that marine and aquatic life is 2000 times more sensitive to nitrates than we are. There is documented die off of reef and marine life, along with a history of nuisance micro algae blooms in areas where elevated nitrates from the wells are detected. This is the kind of pollution regulated more strictly by NPDES standards of the Clean Water Act.

The problem with losing this appeal is not that the county needs to avoid a settlement, but that some large petroleum and chemical and mining and farming companies appear to see this appeal as creating a loophole that would allow them to resume the dangerous polluting they indulged in before the EPA and Clean Water Act.

Unfortunately, the current national administration appears to be making it clear they stand with polluters against regulations that protect the environment.

This is evident in the president's appointments of industry lobbyists to head regulatory agencies and cabinet posts.

This also makes it difficult to get unbiased information from agencies whose loyalty now is to profits and business and industry, instead of to the people or the aina.

Mahalo,
Daniel Grantham

Sent from my iPad

We urge the country to settle so this proposal will not go to the Supreme Court. Trump doesn't give a damn about the environment and the Supreme Court probably doesn't either.

Our coral reefs are dead or dying. We must do whatever it takes to stop the pollution. It is worth any amount of money to protect our oceans....it's why tourists come here and they won't if the coral is dead and the fish are gone.

If we lose tourists, we lose money.

It is proven that the wastewater from injection wells are destroying the reefs and causing harm to people snorkeling who get skin or sinus infections from swimming at Airport Beach.

Although we don't need MORE tourism, we do want the ones who have been coming to Maui to return and the way things are going, many think Maui is already ruined !

Please use wisdom and do the right thing for our oceans before it really is too late!

Hi, my name is Keith Kropf and I live in Naalehu, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Aloha. We need our coral! Please do what you can to help stop the pollution that has killed most of our coral in Hawai'i.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Regards,
Keith Kropf

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Council Chair Kelly T. King,

Hi, my name is Maria Endler and I live in Kaneohe, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

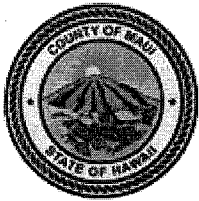

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Council Chair Kelly T. King,

Hi, my name is Richard Furst and I live in Honolulu, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Nothing is more important than clean water — wai is life. The implications for this court case spread far beyond the shores of Maui. It is imperative that you recognize this and do the right thing for the entire country's communities and waterways. Please let this case go!

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by

dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Maui County GET Committee,

Hi, my name is Phyllis Durante and I live in Mililani, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

I do not want humans to continue to pollute our water sources whether it is the rivers, lakes or ocean. The water that we have in our Planet is precious and is the only source of water that exists as it has in the past and in our future.

How we treat this precious resources impacts our future.

As Stewards of the Planet, we alone are responsible for all living things and we control the future.

When we contaminate our water, we affect all living creatures in the ocean as wellness all living things.

This pollution affects so much more than just worrying about swimming in polluted water!

It affects all life now and in the future.

Please stop!

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. Subject: resolution 19-178...

August 30, 2019

Governance, Ethics, and Transparency Committee Maui County Council

Re: Resolution 19-178.

Dear Committee Members,

We are writing to you today urging you to vote to request that Maui County settle with the plaintiffs regarding the use of injection wells by the Lahaina Wastewater Reclamation Facility.

Though the use of the injection wells has proven expedient, allowing the County to avoid upgrading its technology and its wastewater treatment processes, relying on these wells has unfortunately caused a much more expensive problem: the fouling of our vibrant coral reefs and beautiful beaches. The despoiling of the commons allows the County and its residents to avoid the inconvenient costs of proper wastewater treatment. It is perplexing that the County feels it needs to spend money fighting against clean water instead of spending that money to actually do its job to clean the water. We are displacing that cost from ourselves onto the shoulders of our children, our grand-children, and our great-grand-children - they will be the ones who ultimately face the bill for the destruction we have caused.

That is a sad legacy to leave them when it is in our power to be better stewards of the land and the waters.

Sincerely,

Mark Thompson and Monique Gedenk

Dear Councilmember Mike Molina,

Hi, my name is Bill Taylor and I live in Kahuku, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Lahaina/West Maui waters have always been fascinating, but polluted by poor sewage practices, since I lived there in the late 60s. Stunning location, dangerous waters to get a coral cut or take broken skin into. The natural Sea of Life, badly imbalanced by the loading of organic materials dumped as 'treated sewage'.

The current sewage outfall only continues the process of damaging one of Maui's richest visitor resources, for the illusion of tax savings. Maui needs to make the correct investment to restore and beautify one of the world's most beautiful ocean, reef, and shore lines. Like any good investment, paid back many times in better income for the area, and richer lives for both resident and visitor.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Councilmember Mike Molina,

Hi, my name is Roberta Vogel and I live in Kihei, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Councilmember Mike Molina,

Hi, my name is Thomas Craig and I live in Kahului, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Regardless of the U.S. Supreme Court, Maui needs a much more comprehensive strategy for management of sewage waste and water resources regarding toxins, nutrients and energy consumption.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

Dear Councilmember Mike Molina,

Hi, my name is Beth Anderson and I live in Kailua, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Our coral reefs, marine life, and oceans are in dire trouble already from global warming and sea temperature rise. Sewage flowing into the ocean is unacceptable, irresponsible, criminal, and amounts to severe abuse of our ocean waters and species. Modernize the plant, take care of our oceans and the planet. No excuses.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Councilmember Mike Molina,

Hi, my name is Lisa Husch and I live in Kihei, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Councilmember Mike Molina,

Hi, my name is Phyllis Durante and I live in Mililani, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

I do not want humans to continue to pollute our water sources whether it is the rivers, lakes or ocean. The water that we have in our Planet is precious and is the only source of water that exists as it has in the past and in our future.

How we treat this precious resources impacts our future.

As Stewards of the Planet, we alone are responsible for all living things and we control the future.

When we contaminate our water, we affect all living creatures in the ocean as wellness all living things.

This pollution affects so much more than just worrying about swimming in polluted water!

It affects all life now and in the future.

Please stop!

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. Dear Council Chair Kelly T. King,

Hi, my name is Hannah Bernard and I live in Paia, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Aloha Councilmembers,

We urge you to withdraw the Lahaina injection well lawsuit from the US Supreme Court, Hawaii Wildlife Fund et al. v County of Maui.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by

dismantling the nation's bedrock clean water law.

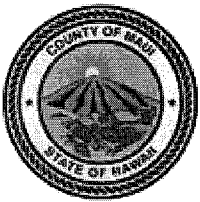

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Regards,
Hannah Bernard

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

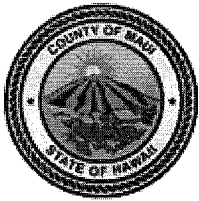

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Council Chair Kelly T. King,

Hi, my name is amber santosbras and I live in Ocean View, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

fix da sewage save our oceans make it safe for our honos and fish and da coral

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Dear Council Chair Kelly T. King,

Aloha, my name is Midi Cox and I live in Honolulu, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

From my grandfather on, members of my family have used their professional expertise to fight for clean water in Hawaii. I hope that will not have been in vain.

Mahalo.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina

facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

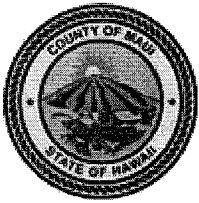

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Regards,
Midi Cox

Dear Council Chair Kelly T. King,

Hi, my name is Sylvia Dolena and I live in Pāhoā, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

I have lived on Maui and my family still owns land on Maui. Please keep the water and aquatic life safe. There won't be much left for the world to enjoy if all is poisoned. Tourists will stop coming.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. Sent: Friday, August 30, 2019 2:53 PM
To: GET Committee
Subject: Lahaina Discharge

Dear Chairman Molina and Committee Members:

I urge you to withdraw the Lahaina discharge case and settle it before it is heard by the U. S. Supreme Court. Although this case has been a topic of major interest on Maui for quite some time, it has drawn relatively little interest outside of Hawai'i. Once it is heard by the Court, and if Maui prevails, it will place a very negative stigma on Maui. The mainland headlines will scream things like "Maui wins right to continue dumping sewage into ocean." This is not the kind of publicity that Maui wants or needs.

The harmful precedent that could be set will also reflect very badly on Maui. The island and its elected leaders will be cast as environmental pariahs. This will definitely affect Maui tourism, Maui jobs, and island economic well-being.

I urge you to settle this case and avoid the publicity of a Supreme Court case.

Subject: Testimony for Tuesday, 9/3/19, 9 AM, from the Kihei Community Assoc GET- 26

Aloha Chair Molina and GET committee members.
Mahalo for setting this matter on this morning's agenda under GET-26
My name is Mike Moran, President of the Kihei Community Association, testifying for the organization.

Please protect our waters and settle this case. This has been our position for several years, as we watched millions of dollars spent to fight it in various courts, lose, and file appeal after appeal now advocating to go to the US Supreme Court to be allowed to continue polluting the *kai* and killing the coral reef system.

Today we see a new wrinkle from the Administration, a last minute (8/27/19) offer by the Mayor to consider a revised proposal for a settlement. But the terms of this proposal are kept **secret**. So much for transparency: so much for sunshine- SHAME. So the community can come to testify on Tuesday morning to express our concerns, but without knowing just what the Mayor is offering in his mystery settlement offer? Really?

We have been asking for a settlement for years, now we learn that could happen, but the terms of the settlement are hidden behind closed doors
. How could any entity speak for or against a settlement without reading it. Just sign a blank check? Just sign the contract without reading it?

So as we continue to ask for a settlement and NOT take it to Trump's supreme court, we mean, & have always meant a transparent fair one. Based on what we have read and heard from the Mayor in the media, including his own live words on his radio program on 8/29/19, we are left to assume his offer is not *pono*

So we support CC 19-178 for ALL settlement offers go to the Council.

Mahalo.

Mike Moran
