Subject: Fwd: Support for Bill LU-26

Subject: Testimony to Support for LU-26

Aloha Council Members,
I'm writing to offer support and testimony to amend the Maui County Charter 19.04 to define the criteria to allow for commercial film, video and photography in residential zoned areas. With this clarification, it will help prevent issues or conflicts with productions that would like to operate within the residential communities. It will also help to foster better communication between the community, the Maui County Film Office and the production companies who plan to film on Maui.

As a long term member of the film production community in Maui County, my business and livelihood is centered and focused on the production industry throughout the State of Hawai'i.

I am in full support of the Maui County Film Office efforts , the Bill LU-26 and any legislation that is supportive of this important industry to our economy.

Mahalo,

Glenn Beadles,
