Dear Madam,

I was shocked to hear about the new proposed bill 6.04.041 to let stray animals starve to death.

While I do understand that stray and feral animals are a huge problem for a community I believe this bill is not only inhumane and heartless, it will not resolve the actual problem. Instead I would like to see that you support a TNR (Trap Neuter Return) order. Support the local shelters financially to get eventually all stray cats collected and neutered will end this in way better than your cruel idea.

I hope you will share and discuss this with the other council members.

I appreciate your support in this matter.
