Department of 'Ōiwi Resources director recommends significant discussions with our county archaeologist Dr. Janet Six should also be done to understand the possible areas that need to be looked at within the proposed section.

The potential impacts to the proposed bill would be the natural resources already challenged by the ever present state of our resources and what our environment can provide for us and how we currently care for this significant resource. Also acknowledging the space for its ever present trade winds that can enhance the use of capturing this wind energy to this proposed area. Along with solar energy and the use of technology today limiting the carbon footprint would be a step in caring for our Mauinui resources for the betterment of our cultural environment and our community.

Mahalo for allowing for the Department of 'Ōiwi Resources to offer input. Please reach out to us at our office number 808-270-6219, if you would like further information from us and we would be happy to engage in sharing what we can.

Mahalo nui loa,

KAPONO'AI MOLITAU Director, Department of 'Ōiwi Resources
