**Subject:** Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 20,000 new transmitting satellites in space.

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Lies never make for truth. What is true here? Millimeter waves are detrimental to being in a place of quiet enjoyment. These waves interfere with the resonance of the natural human wavelengths needed for species health. Recipe to slow bake every ecosystem. Say Hell no.t

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 20,000 new transmitting satellites in space.

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment [www.BioInitiative.org](http://www.BioInitiative.org). Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 20,000+ new transmitting satellites in near space [www.5GSpaceAppeal.org/the-appeal](http://www.5GSpaceAppeal.org/the-appeal)

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.
