**Subject:** Rivers Contain Groundwater (Makila Farms topic)

Aloha e Chair and Council,

Thank you for your time and consideration on the issue of 201-H for Makila Farms today. I apologize for going over my time, I am very passionate about this issue and had many points to make.

I was pretty nervous on the stand and froze when councilwoman Paltin asked me about potable and non potable water affecting each other. I do believe they are connected, after much research and study I have found valuable information to support this belief. Please see the USGS link below which presents data regarding rivers (non potable) containing groundwater (potable).
