Subject: IEM-33 and sand stock-pile facts

Aloha Elle and members of the committee,

I thought you would be interested to see that I enquired about buying "beach quality sand" from Hawaiian Cement's six-year stock-pile for our beach projects. But it's actually not available for any uses except HC own projects. They do not have any sand to sell to anyone else for any purpose.

Hi Patricia, thank you for your email. Although our 6 year supply sounds impressive, it is a relatively small quantity. Because sand is not readily available, we must conserve everything we have for our own operations. I'm sorry but we do not have any sand to sell.

Subject: sand

Aloha David,

I believe we met a few years ago at one of our beach restoration projects in Spreckelsville. We've been following the proposed sand moratorium bill and noticed your letter of testimony regarding your impressive 6 year stockpile of sand. Your wisdom and foresight puts you in a unique position!

Our beach projects have current permits in place but we need access to beach quality sand. Do you have beach quality sand and would Hawaiian Cement be willing to sell beach quality sand to us?

Mahalo,
Patricia Cadiz,
