Subject: Testimony in Opposition to Plastic Foodware Ban

Dear Chair Sinenci,

We are having difficulty in understanding what is acceptable and what is not Council members in Honolulu who voted for the ban will have to know what products for the purpose it is used for -if not what was their thinking when the my voted yes?

They weren't. As an employee working for a company that sells various products we are having difficulty bringing in the so called "acceptable" products. Our end users will not have the correct products which means at the end that the people of Island will be the one to suffer. Who will take care of them?

Thank you for the opportunity to testify.

Sincerely,

Diane Maeda
