Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.Biolinitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GspaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

From: John Gelert <jgelert@yahoo.com>
Sent: Monday, July 06, 2020 9:24 AM
To: EACP Committee
Subject: 5G information for meeting 7/7/2020

Attention: Environmental, Agricultural, and Cultural Preservation Committee

Aloha Committee and Council Member Shane Sinenci, Chair!

I recently wrote this letter to the Mayor's Office. We won! This tower will not be built. This letter contains valuable information for you to consider in the upcoming meeting on 7/7/2020 on 5G.

"I am upset to learn about Verizon Wireless' plan to install a 5G cell phone tower at Kihei Baptist Church. 5G frequencies are very harmful to humans, animals, and plants. The only reason that Maui is a sanctuary virtually free of "Covid-19" illnesses is our slowness to install 5G infrastructure on our island. If you do nothing to stop this tower, then Maui residents will start dropping like flies as we see all over the United States in "Covid-19" cases all over the world. Heavy exposure to any kind of wireless radiation including WiFi can cause the blood to coagulate, and thereby not allow it to transport oxygen and vital nutrients the body needs to live. About 75% autopsies of "Covid-19" mortalities showed the blood was coagulated unnaturally. 5G also includes millimeter waves including 60 GHz which is scientifically known to be the oxygen absorption frequency. Oxygen molecules heat up at this frequency; the lungs are unable to receive oxygen in the presence of 60 GHz. This is why many people in large cities including New York feel like they can't breathe, yet their lungs are not filled with fluid as in patients that have pneumonia.

There are thousands of independent scientific studies that proved wireless radiation is harmful. 5G millimeter wave frequencies are even more harmful. Some of those frequencies were developed by the US Military as active crowd control weapons to stun people. And yet the wireless industry claims that they are harmless. That is because they pay industry scientists to write studies to say that. They can get away with that, because the FCC is a captured agency. It is politically controlled to deregulate this industry, instead of regulating it like it is supposed to. The industry claims there is no harm unless the wireless radiation heats up the subject, a 1996 standard. That is scientifically proved to be a lie. Wireless radiation causes DNA damage, which causes cancer. It also damages mitochondria by activating voltage-gated calcium channels, and causes cell death. This scientific article explains much more about the harms of this wireless radiation:

Please stop all 5G cell tower installations! You can proceed again if you prove they are safe. It is not just about aesthetics like a funky pine tree in Kihei. It is more about the harm that you will cause to Maui residents who live nearby, and for those "canaries" in Kihei Baptist Church who will be harmed if they build that. And since I didn't get a chance to write about other proposed high-frequency wireless installations, please put a moratorium on millimeter wave police and hospital communications equipment too!"

Our colleague Debra Greene, PhD, whom you know, provided more information here about the harmful effects of wireless radiation:

1) Wireless radiation damages the environment including birds, bees, trees, plants, animals, insects:

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

To: Kelly King <Kelly.King@mauicounty.us>
Subject: Let's Kill 5G Before it Kills Us!

Dear Ms. King,

I am writing to express my strong opposition to the roll out of 5G small wireless cellular antennas/towers, both on land and in space.

The US National Toxicology Program shows "clear evidence" of statistically significant carcinogenic effects from background wireless microwave radiation: <https://ntp.niehs.nih.gov/results/areas/cellphones/index.html> ; Hundreds of independent researchers, scientists and physicians have spoken out against wireless radiation saying it will both exacerbate and create new health problems for all biological beings, especially vulnerable populations already impacted by our current microwave dense environment. Symptoms include headache, loss of energy, cancer, heart and neurological illnesses, genetic damage, autism, immune system disorders and other illnesses and a growing number of health professionals are opposing the roll out of 5G, <http://citizensforaradiationfreecommunity.org/5g-papers/#>.

5G is millimeter wave radiation used by our military and police for crowd control and other weaponry.

Communities all over the US and world, including fire fighters are blocking the roll out of 5G for health and safety: <http://citizensforaradiationfreecommunity.org/5g-blocked-due-to-health-and-privacy-issues/>

We ask that you enact an urgency ordinance banning these antennas and that no 5G satellite radiation be allowed to permeate our air space.

I request that:

installation of small cell 5G antennas or any other new wireless infrastructure throughout our community and nation be blocked and that we enact urgency ordinances establishing support for local antenna control where it has not already been established, <https://smartmeterharm.org/2019/04/06/breaking-california-supreme-court-affirms-municipal-authority/> and dissolve recent FCC orders to streamline 5G.

no low orbit or otherwise terrestrial oriented 5G satellite radiation be beamed down to our community.

support be given for emergency ordinances/legislation providing relief from the dangerous microwave radiation environment we are already experiencing, including creation of RF/millimeter wave free areas where people experiencing health effects from the current wireless infrastructure can safely live.

emergency executive orders be issued that eliminate un-Constitutional wording in Section 704 of the Telecommunications Act of 1996, which disallows consideration of environmental effects from cellular antennas.

oversight of RF/millimeter radiation be returned to EPA with full funding for new non-ionizing radiation scientific division, independent of industry influence, that "non thermal" effects be added to assessment of harm and that ALL stake holders voices be heard, including those currently being involuntarily subjected to and harmed by the radiation.

adherence to the 4th, 10th and 14th of the US Constitutional be enforced and our rights respected.

no indemnity or tax payer funded bailouts from Congress for lawsuits against wireless industry.

Sincerely,
Lucy Bell

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GspaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BiolInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GspaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: 840546502 TESTIMONY

Good Afternoon,

I oppose 5G.

I oppose the 5G cell tower in my neighborhood in Haiku that I see from my house.

I oppose the cluster of 5G cell towers in the upcounty Makawao and Kula school districts.

I oppose 5G drone presence in our Aina skies.

Why 5G? If it has indeed been used as a weapon in the past, it is not welcome here.

Sincerely,
Lucy

Subject: RE: EACP-44 CC 19-348 Oppose 5G

Dear Council,

Thank you for an informative meeting today.

I am opposed to the development of 5G on the island of Maui, or anywhere, really.

The lengthy, detailed testimonies by educated professionals today should assure our county leadership that 5G is untested and unproven to be safe.

There is also no need to use 5G technology. There is no benefit. Future technology is not dependent on 5G. Other advances will happen without 5G. We do not need smart houses and smart cars on our island. There are other more pressing issues which we should dedicate our time and our developing technologies for, such as agriculture and affordable housing.

Some people are attracted to shiny, new things simply because they are shiny and they are new, like a bracelet. But what if the shiny, new thing is not jewelry, but a razor blade at your wrist?

Respectfully,

D Austin

Subject: EACP 7.7.20 Meeting Faith Chase Testimony

Faith Chase

faith@planetsever.com

July 7, 2020

EACP Committee,

I am writing to testify on items: EACP-44; EACP-20; and EACP-41

In regards to Telecommunications Regulations, EACP-44, I am absolutely opposed to any 5G technology. I have been reading and learning more about this subject matter from a few local researchers and in California wherein within two months of installing 5G near a school, several school aged children were diagnosed with unusual ailments and cancer. In addition, in observing the outcry of objection to 5G by progressive countries, I caution Maui and Hawai'i in making any premature decisions without thorough scientific study regardless of how the industry has been able to progress until now. Please also see that Lana'i is provided some oversight with the unusual report of an authorized airport that was apparently suited for LOON technology, drone airport and other sorts of other large technology devices that was not properly vetted through the island community.

In regards to **Maui County Archaeologist, item EACP-20, I just want to convey great satisfaction in learning that Dr. Janet Six** is a new hire. This is particularly good news to learn as her work in Hawai'i to date has been extremely thorough and culturally sensible and sensitive. Our extraordinary archaeology and sacred sites deserves scholar talent as of Dr. Six. I believe the past frustrations of iwi kupuna and developments with poor preparation will be improved with this area expert.

The last **item EACP-41 regarding the Kula Agriculture Park Committee, I need to again, I strongly suggest that organic farmer representation must increase on the Kula Agriculture Park Committee.** I realize Commissions are not the subject of speak to today but I am choosing to take this opportunity to explain that when selections were being made the request for organic farmer representation fell on deaf ears. While one member is a clear organic member, based on the size of the board, it needs better balance of natural farmers.

Thank you for this opportunity to testify on items that warrant conversations.

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Testimony EACP-44
Attachments: 5G County Council Letter.pdf

Aloha,

Yesterday I provided an oral testimony stating my opposition to the roll out of 5G in Maui County.

In my testimony I shared a portion of the attached letter. Upon Mr. Sinenci's request, I am now submitting my letter in its entirety.

After my testimony a couple of questions were asked in the meeting that I would like to address:

1-Mr. Sinenci inquired if the 5G installed in the upcounty area were on pre-existing poles.

The 5G cell tower that was recently installed in Hā'iku is free standing. There was nothing previously there. It is on Kaupakalua Road, near Herman's, and is disguised to look like a tree.

2- Ms. Paltin asked about switching from WiFi to ethernet to reduce EMFs in the home.

I have recently done this, and would be happy to provide the simple steps I took to make this happen. I can be reached by email, text or phone :)

Mahalo,
Maggie Costigan

July 7, 2020

Dear Maui County Council Members,

I am writing with regard to Telecommunications Regulations EACP-44.

I would like to start by saying that I am adamantly opposed to the rollout out of 5G that is happening world-wide.

In facing the roll out of 5G technology in Hawai'i, and more specifically in Maui County, we must take the opportunity to consider the facts regarding the dangers of 5G, and the potential harm it will bring to our community, BEFORE moving forward.

There are currently 15 5G instillations in Maui County, one of which was just recently installed near my home in Hā'iku. This instillation happened without any proper notice to, or consent from, Hā'iku residents.

The electromagnetic standards used by the FCC, which telecommunication companies often use as their argument towards the safety of EMFs, are based on "**thermal heating**" and are 30 years out of date.

From a health perspective, there are a multitude of scientific studies* that have shown that constant exposure to base transmitting stations (cell towers) cause a significant increase in cancer, type 2 diabetes, embryo disruption, cognitive impairment including: delayed fine & gross motor skills and memory, circulatory problems, tremors, depression, sleep problems, increased suicide...I could go on.....these are from radiation levels that are "**non-thermal**".

From an environmental perspective, 5G also poses a tremendous threat. 5G frequencies are highly absorbed into insects, especially bees, which studies* have shown leads to changes in insect behavior, physiology, and morphology. Knowing that insects are a vital part of a healthy ecosystem and thriving agriculture, 5G would be detrimental to our precious environment, as well as our agricultural economy. In addition, studies have also shown negative impacts of 5G frequencies on bird and plant life, which would deplete the efforts devoted to species conservation here in Hawaii.

Who will be liable for the health and environmental impacts that 5G could create in Maui County? ...certainly not the telecommunications companies!

5G has been called "*The Largest Unethical Medical Experiment in Human History*" because it violates the key ethical medical experiment requirement of 'informed consent' from the participants. If the telecommunications industry's plans for 5G come to fruition, no person, no animal, no bird, no insect and no plant on Earth will be able to avoid exposure, 24 hours a day, 365 days a year, to levels of RF radiation that are tens to hundreds of times greater than what exists today, without any possibility of escape anywhere on the planet.

I was first alerted to the dangers 5G when I received an email stating that 5G technology was being installed in schools on the continental United States. This email inspired me to research what 5G is, the benefits it offers, and the potential harm it can cause.

As a teaching artist in Maui County public schools, I believe our schools should be a place of integrity, providing a safe environment that nurtures healthy, positive growth for our keiki. 5G does not support this notion, in fact it derails it.

Many cities across the nation and throughout the world have passed ordinances and signed resolutions to halt 5G build out until research and testing show its safe for humans and the environment.

I ask that Maui County follow suit and halt 5G rollout and potentially ban 5G until...or rather **if**....science shows substantial proof that it is safe. As an alternative, safe options such as **fiber optics** could be explored.

I thank you for your time and thoughtful consideration of this matter!

Sincerely,

Maggie Costigan

EACP Committee

From: semyonbilmes@gmail.com
Sent: Sunday, July 12, 2020 5:31 PM
To: EACP Committee
Subject: Attention to the Council Member Kelly King

Dear Kelly, I am following on your request from the a committee meeting on danger of 5G technology.

Here is my petition:

Dear Members of the EACP Committee,

The Advisors to the International EMF Scientist Appeal, representing 248 SCIENTISTS FROM 42 NATIONS, have submitted The Appeal to the United Nations Environment Program requesting assessment of the harmful biological impacts of 5G telecommunication technologies to plants, animals and humans. [1]

Another 190 international scientists in an Appeal to the UN and the World Health Organization on the risks of electromagnetic radiation emitted by telecommunications and utility technologies.

The Appeal says, "THE TIME TO DEAL WITH THE HARMFUL BIOLOGICAL AND HEALTH EFFECTS IS LONG OVERDUE. TO PROTECT OUR CHILDREN, OURSELVES AND OUR ECOSYSTEM, WE MUST REDUCE EXPOSURE BY ESTABLISHING MORE PROTECTIVE GUIDELINES." [2]

Insurance companies have made headlines by refusing to insure against wi-fi and 5g-related illnesses stating:

"Our risk assessment team's report compares these wireless technologies with asbestos, in that the early research on asbestos was "inconclusive" and only later did it become obvious to anyone paying attention that asbestos causes cancer." [3]

Richard Blumenthal, Democrat Senator wrote to the Federal Communications Commission:

"Most of our current regulations regarding radio frequency safety were adopted in 1996 and have not yet been updated for next generation equipment and devices. For example, the FCC's Specific Absorption Rate (S.A.R) limits do not apply to devices operating above 6 GHz; however, 5G devices will operate at frequencies as high as, or even exceeding 24 GHz." [4]

The FCC itself has acknowledged, "the S.A.R. probe calibration, measurement accuracy, tissue di-electric parameters and other S.A.R measurement procedures - required for testing recent generation wireless devices - need further examination." [5]

History repeats itself. Just like it took some time for real science to catch up with carcinogenic properties of cigarettes, so too will real science catch up with 5G after much suffering and illness.

I just hope that this body of our elected officials will be wise not to play Russian roulette with our lives, health of our keikis and our beautiful Aina we call home.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BiolInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

I don't understand why 5G has to have huge drones in the sky over my homeland, my mom was born and raised in maui and my dad was raised this is not good for the natural energy for the island nor for the world! this is disrespectful, one

day scientists will have to learn that we need to go back to the old ways of living and believe it is just enough how the universe created it to be.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: I am a teacher, please read me.

Aloha Council Member King,

I have been a longtime resident of Paia, Maui. I am a tutor and teacher for middle schoolers. I have a classroom at Heritage Hall in Paia. My classroom is within 300 feet of an ATT cell tower that is hidden on the watertank of the old sugar mill on Baldwin Ave. The parents of my students and myself included are very concerned about harmful effects of the frequencies being emitted from cell towers! More and more studies reveal the harmful effects of these frequencies on living organisms, they especially should not be in the vicinity of schools, hospitals and residential areas! ATT engineers came out and did an emissions report, they (ATT - Conflict of interest?) concluded that we are in the safe zone, they sent me a report with the explicit instructions that I was not allowed to make this report public. It's as if the fox is watching the hen house! I also hired a private individual to do another independent reading at the property, the emission report far exceeded the safe standards. I am so mad! I want you to protect the citizens of Hawaii, not protect large corporations with their insatiable appetite for greed and power who don't care for the health and safety of Maui's citizens! Before signing any bill, you should have your staff do some research into this instead of relying on the science that the telcom companies provide you, again this is a conflict of interest! This should be independently tested. Your interest should be that of the people of Hawaii! I have provided some links below so you can inform yourself before you sign any bills on this topic, I hope you read/watch them.

In June of 2018 Governor Ige signed into law legislation enacting the rapid deployment of 5G across the state. This untested technology is categorically different than anything that has existed in the history of the planet. It requires thousands of newly erected small cell antennas blanketing residential neighborhoods, using public infrastructure (street signs, lamp posts, etc.) to emit toxic levels of extremely high frequency (millimeter wave) wireless radiation.

As of June, 2019, there were 65 5G small cell arrays on O'ahu, and a StarLink 5G satellite in orbit overhead, resulting in the involuntary exposure of O'ahu residents and visitors to unsafe levels of wireless radiation without their knowledge or consent.

In addition, a football field sized 5G drone is being considered for Lana'i. As of August, 2019, the Hawk30 Use Determination Application states: "The purpose of the Hawk30 program is to develop new airborne overhead 5G communication, which would provide strong wireless service over a large area, including deep valleys, remote lands, and over the ocean."

A growing list of cities including New York, Boston, Seattle and Portland are filing lawsuits against the FCC for overriding local authority to impose this hazardous technology. Millions of new 5G base stations on Earth and 20,000 new transmitting satellites in space will saturate the planet with wireless radiation. Despite widespread denial, evidence that wireless radiation is harmful to life is already overwhelming. These 5G plans threaten to provoke serious, irreversible effects on humans and permanent damage to all of the Earth's ecosystems.

When will politicians, like yourself put the citizens' interests, before the interests of large corporations?

Please, on behalf of the citizens of Maui, inform yourself about this matter.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Subject: Stop Giant 4G/5G Drones Until Health & Environment Effects Are Studied

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GspaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe. www.KeepYourPower.org/drone

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop 5G Until Health & Environment Effects Can Be Studied

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop Giant 4G/5G Drones Until Health & Environment Effects Are Studied

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.Biolnitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

Subject: Stop Giant 4G/5G Drones Until Health & Environment Effects Are Studied

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.

santa rosa, ca

no 4G/5G in Hawaii! Supply Fiber to the Premises instead. Local gov't can regulate it as a utility for faster, safer internet connections.

Subject: Stop Giant 4G/5G Drones Until Health & Environment Effects Are Studied

Attn: Land Use Commission. Stop Giant 4G/5G Drones Until Proven Safe

Secretive, experimental, high altitude technology (massive drones, pseudo-satellites, huge helium balloons, etc.) with 4G/5G wireless communication payloads that beam toxic wireless radiation deep into land and ocean, into all life forms, should not be allowed in Hawai'i airspace.

Thousands of peer reviewed research studies www.BioInitiative.org show the negative health effects of radiation from wireless technologies. 5G especially is an alarming health hazard www.5GSpaceAppeal.org/the-appeal

Wireless technology poses significant harm to humans, animals, marine life, and the environment. We do not consent to this harmful and invasive technology. We respectfully ask you to please protect the Hawaiian islands, follow the Precautionary Principle and ban this technology from Hawai'i airspace unless it can be proven safe.

Aloha,

Thousands of peer reviewed research studies show the negative health effects of radiation from wireless technologies. As such, 5G wireless technology poses significant risks to humans, animals and the environment www.BioInitiative.org. Despite this, in 2018 Gov Ige implemented legislation for streamlined deployment of 5G across the state.

5G has never been safety tested. Thus it constitutes a human experiment without consent. 5G builds on existing 3G and 4G/LTE infrastructure but is categorically different, involving newly erected small cell antennas blanketing residential neighborhoods (every few houses), using public infrastructure while emitting toxic levels of extremely high frequency (millimeter wave) wireless radiation never before used for internet or cell phones. It involves millions of new 5G base stations clustered closer to the ground - closer to homes and schools - and 40,000+ new transmitting satellites in near orbit www.5GSpaceAppeal.org/the-appeal

We do not consent to this involuntary exposure of wireless radiation. We respectfully demand the state of Hawaii place a moratorium on any 5G infrastructure until independent scientific studies are completed and show this technology poses no harm to humans, animals, or to the environment.
