**Subject:** SAVE FRONT STREET APARTMENTS

I am a 76 yo widow living on a fixed income with no way of keeping up with what the market will bear and am afraid of our complex being no longer affordable. I have many neighbors who are in this same predicament of losing our affordable homes unless we have someone/somebody to step in and fight for our piece of paradise when neighbors helped neighbors; even helped strangers who had less than us....not meaning that we had more; but it was always looking after each other. This is the principles my parents instilled in us so maybe I am expecting too much from those of you who are in power to kokua us in keeping what little we have. I do not want to think that my future alternative of having a roof over my head will be somewhere in the bushes near a public bathroom. All I'm asking is be my champion and help save FSA affordable so I don't have to find alternative living somewhere on Maui.....mahalo
