**Subject:** Opposed to Makila Farms Project

Sent from my iPad

Aloha Committee Members,

We are stating our opposition to FAST TRACKING Makila Farms or any housing development that includes Market rate dwellings in West Maui.

It is not right that no environmental impact study is required for this large project.

CPAC is trying to do their job of helping to form a community plan of RESPONSIBLE development that would focus on affordable housing and this large project is basically just like the one that was recently denied !

Because of its density and the large number of Market rate homes, The Makila Farms proposal undermines all the hard work that the residents in the neighborhood have been working on .....also known as "We Are West Maui." It does not comply with the Values of the surrounding community as it's impact would be detrimental not only to the environment but also to the quality of life of the surrounding Neighborhoods and west Maui in general.

Sincerely,      Suzanne Albers
