Subject: affordable housing projects

To Whom It May Concern, I am opposed to the affordable housing projects proposed for the Launiupoko area in general and am writing about Makila Farms in particular. The fact that the project has added ohana's to its plan only adds insult to injury. This area already is at the breaking point in terms of water, and traffic. The fire danger as has been shown in the past is very high. Allowing all these septic systems this close to the ocean will a disaster for the reef and the ocean ecology in general. I believe that high density employee housing is a need for the Westside but it should be placed where it has access to city water and city sewer. I also believe that these high density high impact projects should not be fast tracked because of their long term effects they need to be closely vetted. Thanks for your attention. Bob Freimuth
