**Subject:** Recycling options

Dear committee chair and members:

1. Could you support the education and delivery of materials for Maui county households to use a 'green cone system' for some of their waste?

- [Green cone system](#)
- [The green cone system was invented in canada](#)
- [Kansas](#)
- [Vermont](#)
- [Other article](#)
- [City article](#)

[Simi Valley Landfill](#), located in a city where I once lived, creates fuel and electrical power out of its waste collection efforts to offset its own and city energy use. Their website does not explicitly state the city power supply, but I took several school groups there on tours, and that's what we learned on-site.

IF we do that already, please disregard.

2) If we do not, can you find a consultant or even contact this landfill to learn about the process?

Thank you for your attention.

D Austin
