Subject: county meeting concerning covid19 public testimony

Aloha county council and panel of specialists for the opportunity to testify on this matter.

My testimony;

Can anyone on this panel answer my question, "What is a virus?". Or, can anyone challenge my assertion of factual science as to just what is a virus? During all this social disruption and panic of the community, I researched what a virus is and found out that our body makes its own viruses. They are actually part of the body's immune system. The cells in our body create hundreds of trillions of nanoparticles called exosomes when the body becomes ill with poisons, toxins, that infect and affect the body negatively. When made, the cell exudes these trillions of exosomes through the cell wall into the space between the cells and act as sponges to absorb and suck up the unwanted toxins. When full of toxins at some point these exosomes morph into something else called 'viruses'. These viruses are not live creatures, they are crystalline in composition. The blood controls the cleaning inside of the cells, and the lymph cleans between the cells. So, it is the job of the lymphatic system to escort the toxin laden viruses out of the body. They are dumped out through the lungs, bronchials, sinuses, intestines, skin, tonsils. If for some reason the lymph is slow in this duty, the body creates a fever to thin the lymph and dissolve the virus structures. I believe that no virus can survive a body temp of up to 105 degrees. Remember the old medical advice, "Feed a fever, starve a cold?" If the immune system is having a hard time then various infections begin to occur.

-The point is, we all create our own viruses. Fact; The so-called COVID19 has never been isolated in the laboratory.

-If it cannot be isolated or, actually even, found, how can a test be created to diagnose someone with COVID19?

-Why is it that the PCR test has a 80-90 % false positive error rate? How many cases recorded are actually a viral infection?

-Enter 5G technology, where toxic wifi radiation has the potential to harm the body's immune system, causing the same symptoms purported to be caused by an alleged COVID19.

Bill Gates and Mr. Fauci have patents and investments into the virus AND the vaccination which will contain aborted fetal body parts or, DNA and, a chip

So here we are, suffering under false pretexts for lockdown and loss of unalienable rights. Loss of jobs and untold businesses going belly up, The government's program is set to extend up to 2025.

This COVID has been less lethal or contractable than the common cold. Or, the flu. How can these extreme measures be foisted upon us when they are certainly not necessary and now the council is looking for the deployment of policy making and funding when this is not even worse than the seasonal flu? People are getting more sick from wearing masks and breathing back in our own CO2. I get dizzy from wearing a mask. I feel sorry for business owners in town having to wear masks.

The various statements and assertions I have made can be verified by true science. I have that. This COVID is not settled science not by a long shot. Before any decisions are made, please have a discussion with us citizens where we can reasonably run through facts and science before we become unlawfully locked down and we have to suffer even worse unnecessary hardship. Please let us discuss this first. We the people do not want lockdown. It is certainly not warranted.

Mahalo, respectfully, Steven (Jade) Bruhjell
