Subject: Plastic problem

Working in hospitality, everyday I witness firsthand the amount of plastic that is used by tourists. Not only that, but the plastic that is provided by the resorts to their guests. Maui's very own people are the ones slowly killing the beautiful island we are so blessed to be able to live on. It is quite clear that without action from people with authority, Maui's destiny looks grim. We need people that have a platform to USE IT. Let us be leaders to the rest of the world instead of following suit after its already way too late. Let us make generations to come proud of the way we stood up.

Mahalo,
Bailey Milde
