Subject: PSLU 30

Good morning Chair and Council members. My name is Travis Polido I am the President of the Waikapu Community Association testifying on my own of myself. I would like to start off by saying that I am for this project for a few reasons
1. Mr. Atherton has attended, meet and listened to the community at almost every community meeting that has been held, and had made changes to his plans based on the communities input that was given to the best of his ability to make the community happy.
2. Mr Atherton has the infrastructure down co the proposed development is going to have a waste water treatment facility, solar farm to power it's own community, and a school to relieve some of the congested schools that we currently have. With this being said I think Mr. Atherton is being proactive and not reactive. I truly believe that Mr. Atherton has set the bar really high on this proposed project, and I feel that the county should make every other development follow this standard to have the infrastructure in place for that proposed development as well as truly listening to the community and just not be a check in the box.

Aloha,

Travis Polido
