Aloha,

Dear Committee Chairperson Kelly King and Committee Members

The presentation by the Planning Department captioned Dead Sea Scrolls belittles our political system and wastes precious time.

And, seems designed to divert attention from answering the question: Why did the Department fail to provide proposed revisions to community plan citizen advisory committees prior to promotion of the Maui island Plan and its adoption? The answer because Director felt good about it

The presentation listed and provided on the agenda as PC trivializes citizen participation...and is of no help; not even as comic relief, the cartoons - ostrich with its head in the sand...a dancing frog...seem a child's attempt to hide inept behavior.

The digitizing of maps serves only to assist administrators, it is on its face an administrative directive.

Please preserve the dignity of your office and our political process by recommending this item be filed without taking up a moment more of the Committee's valuable time.

Mahalo

Jim Smith 572-0218
