Subject: Testimony

Dear Council,

As a conservationist, I have always been deeply concerned about the long-standing issues that feral cats present to native species on Maui. While logical and humane solutions are difficult to come by I fully support the bill that will no longer allow people to feed feral cats. As citizens of Maui it is our responsibility to protect the Earth and the native species that live here. Feral cats have only one place on the island and it is happily living in people's homes, not destroying native habitats. Thank you for your time and consideration in this process.

Mahalo,
Erin Bell
