**To:** EACP Committee  
**Subject:** Support Bill: Keeping our County Parks and roadways free of chemicals

Aloha, dear Committee Members,

Please pass this bill in support of keeping our parks and roadways free of pesticides and other chemicals which are interfering with the health of the soils, air and groundwater. Our kids, Public Workers, bikers, joggers, visitors and residents will be very grateful to not being poisoned by glyphosates ( round up ) and other ingredients causing interference in brain, lung and intestinal health.

It will help to insure their health. Another important point is that pesticides are airborne and there are a considerable amount of studies to demonstrate how far the wind can carry these noxic substances and injure other citizens.

Mahalo for your kind support,

Rev. M. Conyers
