Subject: Testimony in SUPPORT of resolution CC-19-178 re: settling the Lahaina Injection Wells lawsuit

Dear Maui County GET Committee,

My name is _____ and I am a resident of _____. I care about this issue because _____.

I am writing in support of Maui County settling the Lahaina Injection Well case (HAWAII WILDLIFE FUND, ET AL. V. COUNTY OF MAUI, RELATING TO THE CLEAN WATER ACT).

Both the Hawai'i district court and Ninth Circuit appeals court have already ruled that the County must get a permit under the Clean Water Act to continue discharging treated wastewater into the groundwater via the Lahaina injection wells. I ask the County to withdraw its appeal and work with state and community stakeholders to modernize the treatment facility and invest in water reuse solutions.

Settling the case would end a detrimental challenge against the Clean Water Act and allow the County to avoid further penalties as long as it diligently works toward solutions. The Department of Health has already made clear that private cesspools and septic tanks would not need to get NPDES permits, so there is no risk to individual homeowners.

However, if the County continues its appeal, it threatens to gut the federal Clean Water Act. If the County wins the case at the Supreme Court, polluters across the United States would be free to contaminate water bodies as long as they release their waste from a pipe just short of the waters' edge or into the ground. The Trump Administration and industrial polluters like pipeline companies, the oil and gas industry, manufacturers, coal-burning utilities, and mining associations are all hoping that you will continue the appeal. As elected officials, I hope you will do the right thing, not for the Trump Administration and industrial polluters, but for public trust waters and present and future generations in Maui and all of Hawai'i.

Maui County has a history of being leaders in environmental protection, and you can uphold this reputation and continue this legacy by withdrawing the appeal. Please help to uphold the Clean Water Act and protect Maui's reefs, which not only provide many economic benefits, but hold cultural and environmental significance for all of Hawai'i. I ask you to support the settlement of the Lahaina Injection Wells case and withdrawal of the appeal.

Sincerely,
Boe Greene

Subject: injection well testimony from autumn ness

--

Imagine what's possible...

Lets talk about what WE actually win or lose at the supreme court.

1. At this committee's hearing on May 20, 2019. Richelle Thompson talked about fines we have to pay if the supreme court rules against COM.

In the underlined parts

She talks about maximum civil penalties, and that the clean water act is a strict liability statute, so you're guilty whether you're aware of the law or not.

Maximum civil penalties are \$53,484 per day, times the 4 lahaina injection wells, for 5 years, which is the Clean Water Act's statute of limitations.

That's \$390K.

She also talks about the 8 Kahului injection wells, which we will be fined for if someone files a complaint. Same math says those fines could be \$780 million

That's a total of \$1 billion, that we will be liable for. How about instead of paying that in fines IF the supreme court rules against COM, this body allocates money over the next decade to actually HELP/fund entities that may be caught up in this COME INTO COMPLIANCE and we just stop allowing the casual polluting of any bodies of water. I'm under the impression that the current settlement ALLOWS COM to use the fine money to upgrade their infrastructure, instead of paying it to the feds. Literally if we operate under the current settlement, EVERYONE wins here, including our future generations and our environment.

She also goes on to say that "Our goal is to operate within the law. IF the supreme court says you need an NPDES permit, the clean water act applies to groundwater discharges, that's what we'll have to do."

I agree. The gentleman from the DOH and Lance Collins both clarified that cesspools are in a different category AND that there are creative permit solutions if needed.

But just for arguments sake, lets say it IS true that if the 9th circuit decision holds up, we have to regulate runoff from car washes, and affordable housing projects....THEN SO BE IT. Ask any of those high school students if carwash runoff and sewage effluent from affordable homes should end up in the ocean and I'll be they'll say no. And they are the ones inheriting this problem.

So, instead of handing this off to a supreme court who is stacked with people who's mission it is to dismantle environmental law in support of corporate profits, lets use the money we stand to lose in fines, and our influence at the state to bring our infrastructure and our state permitting processes in line with both the letter AND the spirit of the Clean Water Act.

2. Amicus briefs filed in support of the Hawaii Wildlife Fund and against the COM from around the US include:
South Carolina dealing with a kinder morgan pipe line rupture into the savannah river
Tennessee dealing with private landfill wastewater leach
Minnesota, Chippewa dealing with discharge wastewater from mines

All of these communities filed briefs concerned that a ruling in the county's favor would gut the clean water act.

A loss at the supreme court could cost us over \$1 billion. A win at the supreme courts guts the clean water act. Lets not go there. Let's keep it here, move forward and find solutions together.

PLEASE. I am literally begging you, to settle. For Maui, and for the rest of the country, to have control over how we DO come into compliance, and EVERYONE wins.

3. A case with this much nationwide consequence should be completely public.
1. Please make the settlement public.
2. Please do NOT go into executive session

I am a Kihei resident. I am writing to urge Maui county to drop it's case in regards to the injection wells before it reaches the SCOTUS. This case has Nation wide implications for clean water and if the court rules against clean water protections it will be disastrous to the entire nation.

I will gladly donate money towards your re-election campaign if the council does the right thing and settles the suit.

Dear Council Chair Kelly T. King,

Hi, my name is Christopher McCullough and I live in Holualoa, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States.

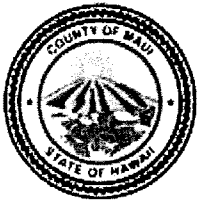

Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling

the nation's bedrock clean water law.

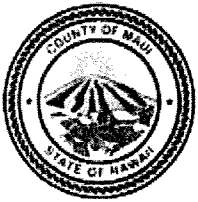

We need your help before Maui County goes down in history as the champion for water pollution in the United States. Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Dear Council Chair Kelly T. King,

My name is Benton Pang and I live in Wailuku, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Aloha ??ina,

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lāhainā facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Regards,

Benton Pang

Dear Council Chair Kelly T. King,

Hi, my name is Eva Daniells and I live in Makawao, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

I have been a resident of Maui for over 40 years and have seen extensive deterioration of our precious coral reefs and much fewer reef fish. The health of our ocean ecosystem is vital for the health of our island and for the health of our economy as well as much of Maui's economy is based on tourism.

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. Dear Maui County GET Committee,

Hi, my name is Felichia Ritter and I live in Honolulu, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Aloha Maui Councilmember Sugimura:

As a resident of The State of Hawaii, our government must increase protection of our reefs. I know Maui County has to dispose of treated sewage, but spilling it onto the reefs is deadly to the reefs. Upgrade our infrastructure to allow use treated waste water for irrigation, this should be a top priority. Fresh water is a precious resource in our islands & we should recycle water from treatment plants to conserve fresh drinking water.

Reef recovery can take decades. Hawaii's reefs are our treasure, tourists flock to marvel at the living reefs & people rely on reefs for sustenance. Please work with nature, preserve our lands & our reefs. Killing the reefs will kill a major part of the tourism industry, & I know tourism is important to Maui's economy. Don't settle for an easy way out, please work towards Maui's future & fighting for the remaining pristine lands & reefs of Maui.

Remember, Hawaii's reefs are Hawaii's treasure, please preserve our treasure.

Respectfully,
Felichia Ritter

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. Subject: RE: 9/3/19 GET meeting; GET-26: It's time to make the pono choice and withdraw the attack against th

Dear Council Chair Kelly T. King,

Hi, my name is Pablo Beimler and I live in Honokaa, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States.

Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai‘i, and the entire nation.

Regards,
Pablo Beimler

Dear Council Chair Kelly T. King,

Hi, my name is Paul Shindell and I live in Kapa'a, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

We don't want Maui to do the dirty work with the Trump administration for our nation's worst polluters by dismantling the nation's bedrock clean water law.

We need your help before Maui County goes down in history as the champion for water pollution in the United States.

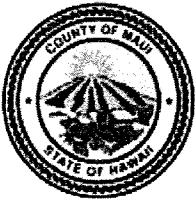

Please, create a lasting, positive legacy by focusing on the solutions for this pollution problem and upholding—not destroying—the legal protections of clean water for Maui, Hawai'i, and the entire nation.

Regards,
Paul Shindell

Dear Council Chair Kelly T. King,

Hi, my name is Felichia Ritter and I live in Honolulu, Hawaii. I am submitting this testimony for the September 3, 2019 committee meeting on item GET-26 (settlement in Hawai'i Wildlife Fund, et al., v. County of Maui).

Aloha Maui Councilmember Sugimura:

As a resident of The State of Hawaii, our government must increase protection of our reefs. I know Maui County has to dispose of treated sewage, but spilling it onto the reefs is deadly to the reefs. Upgrade our infrastructure to allow use treated waste water for irrigation, this should be a top priority. Fresh water is a precious resource in our islands & we should recycle water from treatment plants to conserve fresh drinking water.

Reef recovery can take decades. Hawaii's reefs are our treasure, tourists flock to marvel at the living reefs & people rely on reefs for sustenance. Please work with nature, preserve our lands & our reefs. Killing the reefs will kill a major part of the tourism industry, & I know tourism is important to Maui's economy. Don't settle for an easy way out, please work towards Maui's future & fighting for the remaining pristine lands & reefs of Maui.

Remember, Hawaii's reefs are Hawaii's treasure, please preserve our treasure.

Respectfully,
Felichia Ritter

As a resident of Hawai'i, I urge you to withdraw the appeal to the Supreme Court, focus on solutions for wastewater pollution, and stop the damage to priceless ocean and reef resources. The county should invest in Maui's future by

building the necessary infrastructure to reuse the Lahaina facility's treated wastewater for irrigation, which is a true "win-win" solution. In contrast, destroying the law to advance the county's "right to pollute" the ocean is a "lose-lose" for both the county and the people.

We need Maui County's elected representatives to show leadership and turn this situation around. It's time to stop the reckless attack on the law and focus on building a responsible wastewater system of the future at the Lahaina facility.

From: Yolanda Pelayo <love@yolandapelayo.com>
Sent: Wednesday, September 04, 2019 2:46 PM
To: GET Committee
Subject: Please protect our waters

Aloha Council Members of Maui County,

I am writing this letter to add my voice and support to the ongoing requests that the Maui County representatives withdraw their petition to push the local issue of water contamination at Kahekili beach from the Lahaina injection well to the Supreme Court. Instead, I ask that Maui County does the right thing: drop this lawsuit and settle matters locally with the best interest of the environment, local residents and tourists in mind.

The negative impacts that the contaminants from the injection well have made on Kahekili beach is already a clear warning sign of what will continue to happen to our local marine ecosystems if we do not take responsibility for ensuring the protection of our lasting clean water in and around Hawai'i.

This issue seems to have brought light to an underlying issue of waste water treatment that needs to be better addressed at several waste water sites around Maui additionally, and I hope that the county will have the courage and good-will to face these issues for the well-being of our global home, planet Earth, as well as the future generations and Keiki that currently coexist with us decision-makers.

In the end the decision is in your hands, and I hope that you will each recognize your kuleana to put the Earth and our children first above all other interests and see the clearest, most respectable solution for all.

Thank you for time in reading this message.

Best,

Yolanda Pelayo

Dear Ms. Kelly T. King,

For over a decade, Maui County has fought to allow the Lahaina Wastewater Reclamation Facility to keep polluting the Kahekili reef. The Surfrider Foundation Maui Chapter and our coalition partners have tried to work with the former Mayor to find practical alternatives. We believe the Wastewater Facility can redirect its effluent to provide needed water for golf courses, commercial landscaping, and agriculture. Instead of working with us, the County has spent over \$4 million in taxpayer money on mainland law firms to appeal each decision lost. As the current leaders of Maui County, you have the opportunity to turn this around. Please do the responsible thing for Maui County and protect our reputation and our reefs. We should use our time, energy and taxpayer dollars to fix the problem, not fight the solution.

If we start planning now, Maui County can develop a long-term solution for our water system that will give us something to be proud of, instead of embarrassing stories of Maui in the news and social media around the country. If the County continues to push this case all the way to the Supreme Court in Washington, D.C., the case will damage Maui's reputation and undermine the Clean Water Act as it's being supported by large corporate polluters like the American Petroleum Institute and the National Mining Association.

These companies want to use this case to sabotage the Clean Water Act and possibly reduce liability for environmental disasters like cyanide drainage from mines and leaking oil pipelines. We don't want to people to associate Maui County with these polluters; nor do we want to help their efforts to undermine the Clean Water Act on a national level. We strongly encourage the Mayor, Maui County Council and the leadership of Maui's state legislators to work together with community organizations

so we can resolve this issue together and protect our island's treasured beaches, coastal waters and living resources.

Sincerely,

Ms. Misty Earnest

To: GET Committee
Subject: Testimony in SUPPORT of resolution CC-19-178 re: settling the Lahaina Injection Wells lawsuit

Dear Maui County GET Committee,

My name is _____ and I am a resident of _____. I care about this issue because _____.

I am writing in support of Maui County settling the Lahaina Injection Well case (HAWAII WILDLIFE FUND, ET AL. V. COUNTY OF MAUI, RELATING TO THE CLEAN WATER ACT).

Both the Hawai'i district court and Ninth Circuit appeals court have already ruled that the County must get a permit under the Clean Water Act to continue discharging treated wastewater into the groundwater via the Lahaina injection wells. I ask the County to withdraw its appeal and work with state and community stakeholders to modernize the treatment facility and invest in water reuse solutions.

Settling the case would end a detrimental challenge against the Clean Water Act and allow the County to avoid further penalties as long as it diligently works toward solutions. The Department of Health has already made clear that private cesspools and septic tanks would not need to get NPDES permits, so there is no risk to individual homeowners.

However, if the County continues its appeal, it threatens to gut the federal Clean Water Act. If the County wins the case at the Supreme Court, polluters across the United States would be free to contaminate water bodies as long as they release their waste from a pipe just short of the waters' edge or into the ground. The Trump Administration and industrial polluters like pipeline companies, the oil and gas industry, manufacturers, coal-burning utilities, and mining associations are all hoping that you will continue the appeal. As elected officials, I hope you will do the right thing, not for the Trump Administration and industrial polluters, but for public trust waters and present and future generations in Maui and all of Hawai'i.

Maui County has a history of being leaders in environmental protection, and you can uphold this reputation and continue this legacy by withdrawing the appeal. Please help to uphold the Clean Water Act and protect Maui's reefs, which not only provide many economic benefits, but hold cultural and environmental significance for all of Hawai'i. I ask you to support the settlement of the Lahaina Injection Wells case and withdrawal of the appeal.

Sincerely,
Paige Wilcox

Subject: Testimony in SUPPORT of resolution CC-19-178 re: settling the Lahaina Injection Wells lawsuit

Dear Maui County GET Committee,

My name is Camille and I am a resident of Honolulu. I care about this issue because "Aloha aina". We are supposed to take care of our land and oceans, not trash it, not pollute it directly or indirectly. Even though I don't live on Maui, I can see this becoming a big issue. Affecting everyone! More than just Maui. Right now the indirect pollution is taking a toll on Maui's reef, and if it were to continue and if Maui county takes this to the Supreme Court then that'll give other people and company's the right to indirectly pollute the ocean. And if that were to happen think of all the ocean wild life, they matter too. They're just important as we are.

I am writing in support of Maui County settling the Lahaina Injection Well case (HAWAII WILDLIFE FUND, ET AL. V. COUNTY OF MAUI, RELATING TO THE CLEAN WATER ACT).

Both the Hawai'i district court and Ninth Circuit appeals court have already ruled that the County must get a permit under the Clean Water Act to continue discharging treated wastewater into the groundwater via the Lahaina injection wells. However, if the County continues its appeal, it threatens to gut the federal Clean Water Act. If the County wins the case at the Supreme Court, polluters across the United States would be free to contaminate water bodies as long as they release their waste from a pipe just short of the waters' edge or into the ground. The Trump Administration and industrial polluters like pipeline companies, the oil and gas industry, manufacturers, coal-burning utilities, and mining associations are all hoping that you will continue the appeal. As elected officials, I hope you will do the right thing, not for the Trump Administration and industrial polluters, but for public trust waters and present and future generations in Maui and all of Hawai'i.

Maui County has a history of being leaders in environmental protection, and you can uphold this reputation and continue this legacy by withdrawing the appeal. Please help to uphold the Clean Water Act and protect Maui's reefs, which not only provide many economic benefits, but hold cultural and environmental significance for all of Hawai'i. I ask you to support the settlement of the Lahaina Injection Wells case and withdrawal of the appeal.

Sincerely,

Camille Borden

Subject: Testimony in SUPPORT of resolution CC-19-178 re: settling the Lahaina Injection Wells lawsuit

Dear Maui County GET Committee,

My name is _Nancy Haag_____ and I am a resident of _Maui_____. I care about this issue because ___it is appalling to let waste water contaminate our ocean waters in a resort community where both children and adults swim____.

I am writing in support of Maui County settling the Lahaina Injection Well case (HAWAII WILDLIFE FUND, ET AL. V. COUNTY OF MAUI, RELATING TO THE CLEAN WATER ACT).

Both the Hawai'i district court and Ninth Circuit appeals court have already ruled that the County must get a permit under the Clean Water Act to continue discharging treated wastewater into the groundwater via the Lahaina injection wells. I ask the County to withdraw its appeal and work with state and community stakeholders to modernize the treatment facility and invest in water reuse solutions.

Settling the case would end a detrimental challenge against the Clean Water Act and allow the County to avoid further penalties as long as it diligently works toward solutions. The Department of Health has already made clear that private cesspools and septic tanks would not need to get NPDES permits, so there is no risk to individual homeowners.

However, if the County continues its appeal, it threatens to gut the federal Clean Water Act. If the County wins the case at the Supreme Court, polluters across the United States would be free to contaminate water bodies as long as they release their waste from a pipe just short of the waters' edge or into the ground. The Trump Administration and industrial polluters like pipeline companies, the oil and gas industry, manufacturers, coal-burning utilities, and mining associations are all hoping that you will continue the appeal. As elected officials, I hope you will do the right thing, not for the Trump Administration and industrial polluters, but for public trust waters and present and future generations in Maui and all of Hawai'i.
