Pets are so important, whether it is homeless at the moment, it will find a home. These little creatures aren't homeless by choice. People have loving hearts and should not be punished for feeding any of God's creatures. Jesus did say," that which you do for the smallest of these, you also do for me."

It would make more sense to control the population rather than keeping people from putting food out for these animals. I would think without food readily available, these cats will become aggressive, which nobody needs. What's the big deal? Just continue with what's been working.

Be kind, be human. Starving any animal to death is nothing short of cruelty. If you starve the cats, they will survive by eating native birds. Then law makers will be upset and complain about that. So many unintended consequences in starving these cats that cost nothing to the people of Maui.

This proposal makes compassion a criminal activity. And it covers not just cats but ANY feral (untamed) animal--no bird feeders, no helping orphan babies, no caring at all. It's inhumanity and animal cruelty in a 'looks good on paper' format. Shame on the council for considering this abomination.

there's no reason for cruelty toward the cats. Remember one of the causes of the plague was the killing of cats which caused an overrun of rats which then caused the plague. Leave the cats alone. They are being controlled quite well by the teams catching them and neutering them

TNR is the most humane and effective way to deal with stray/feral cats. Starving them will merely make them hunt more, causing damage to wildlife. Besides, tender-hearted people will risk fines and arrest to make sure they eat.

It makes sense to feed the cats since this also goes hand in hand with catching the cats, sterilizing them and releasing them back. It keeps the population controlled and limited to specific areas. If the cats stop being fed they'll begin foraging for food throughout neighborhoods and/or killing wild birds

Feral cats will do more harm unfed than fed, monitored, trapped and neutered. In addition, without the protections that neighborhood cats currently have there will be negative impacts on other pet species. Most significantly there will be greater impacts on wild birds and other endemic. Finally... Read more

This is outrageous!

The spay, neuter and release program is working. Shame on those who promote animal cruelty!

Everyone knows that spay/neuter with trap and release is what controls feral cat colonies. Starvation is cruel and abusive and whoever thought of this should be charged with felony animal abuse.

We need the TNR programs to be expanded ! Right now it's just Private citizens stepping up. Funds should be provided to the Humane Society to help them start their own program. It's been very successful on the island of lanai and now they don't have a feral cat problem

So the island paradise thinks it's perfectly ok to starve animals? Fo4 what purpose? As a cat lover and guardian, I would rather see cared for colonies than dead bodies On my vacation.

Starving cats is not a way to control the overpopulation on this island, TNRM is the only scientifically proven way to help curb the cat population! This is cruel and inhumane and will not be supported by residence or visitors alike, get rid of it!

It is inhumane and there are far better ways to keep control over the cat population through trapping spaying and neutering which has been working in diminishing the numbers

I have seen first hand how well trap neuter release and manage colonies work in reducing the number of feral cats. Thinking that starving animals could in anyway prevent breeding is ridiculous, you will just have higher numbers of hungry animals. This is the most inhumane thing I have seen in a... [Read more](#)

There are smarter and more humane ways to do this please consider researching and working within your community. There are mechanisms with this common goal in place that just need support. Plus lots of other bills about helping native species should be requiring gov attention right now.

It is inhumane to let animals starve. The animals will come closer to businesses and be a nuisance. And they will look horrible, which won't reflect well on us as an island to tourists.

Starving cats will not work and will further add to native bird deaths. TNRM is the only humane solution. Toxoplasmosis comes from undercooked meat. Humans and other animals don't get it unless you eat cat feces. Let's be sensible and COMPASSIONATE.
