**Subject:** Water Use & Development Plan

Please postpone the upcoming Water Use & Development Plan until the most-affected communities, particularly Ha'ikū, have been fully briefed and their thoughts seriously sought.

As this plan is over 1200-pages, I suggest you enlist a neutral but knowledgeable person to explain the "nuts & bolts" of the plan and then gather their opinion. Maybe someone from the new Dept. of Agriculture as long as they are neutral on the issue. It might take two or more meetings.

I have kalo farmers friends who reside and plant in that area who could be adversely impacted. Likewise, while I don't live there, I don't want our precious ag water resources being wasted to keep another golf course in Wailea green.

Respectfully,

Marty Martins  
Kihei
