Dear Chair Lee:

**SUBJECT: 2021 ANNUAL STATUS REPORT ON THE  
IMPLEMENTATION OF THE MAUI COUNTY  
COMMUNITY PLANS**

Transmitted for your review and consideration is the Planning Director's Report on the status of implementation of eight Maui County Community Plans required pursuant to Section 8-8.5, General and Community Plans, of the Revised Charter of the County of Maui (1983), as amended, and Section 2.80B.030, Maui County Code (MCC). The ninth community plan, Kaho'olawe Community Plan, has been excluded from this report because its implementation is within the jurisdiction of the Kaho'olawe Island Reserve Commission, and there have been no related County actions. This report provides an explanation of the County's progress towards implementation of the Community Plans derived from County agency reports as well as enforcement.

**IMPLEMENTATION**

In each of the eight community planning documents of Maui, Lāna'i and Moloka'i, the oldest dating back to 1994, there are implementing actions that set forth a procedure, program, or technique for effectuating the intent of the supporting policy or policies within their subsection. Most of the implementing actions in the County's Community Plans (CP) fall within the County's jurisdiction. For the purposes of this report, each implementing action has an assigned County

COUNTY COMMUNICATION NO. 22-21

department as the lead agency, even though coordination of two or more County departments can and often must occur. For those actions that fall under federal or state jurisdiction, or engage private entities, the County may provide support or assistance, but the County has no direct responsibility for these actions or authority to require implementation.

The Department of Planning (Department) recognizes that some plans contain inconsistencies between language within the body of the plan and language in the implementation action "matrix" found at the end of the plan. In instances where the language differs, the Department defers to the language contained in the matrix.

Status reporting was completed by surveying the different departments' and agencies' assigned actions and by using four criteria. The departments and agencies provided their best estimate of their progress on the implementation of each action item within each plan. They indicated if the item was in one of four stages of implementation: "**Completed**", "**In Progress**", "**Ongoing**" or "**Not Begun**". "Completed" indicates the program/policy/action has been implemented. "In Progress" indicates the department or agency is addressing the program/policy/action or has addressed it to some extent since its adoption, but has not yet completed it. The "Ongoing" column indicates the program/policy/action is an ongoing effort and will never be 'completed' because of its continuing nature. "Not begun" indicates the department or agency has not taken any action on the program/policy/action.

The overall progress towards implementation indicates that of the 835 total actions contained within all eight of the CPs combined (excluding Kaho'olawe), Maui County, other government agencies, and partner agencies have implemented 142 actions, or 17%; have partially implemented 287 actions, or 35%; have 162 actions that are ongoing, or 19%, and have not implemented 244 actions, or 29% (Table 1). The overall progress towards implementation by each

department or agency, and also by respective community plan, is also provided in this table. Exhibit 1 contains matrices of each department's or agency's respective CP's Programs, Policies and Projects and their status of implementation. Also attached is Exhibit 2 which contains the same information as Exhibit 1 but is organized by CP area.

## **ENFORCEMENT**

The General Plan is comprised of the Countywide Policy Plan (CWPP), the Maui Island Plan (MIP) and the nine CPs. These documents are designed to be a key resource for County staff in assuring that the goals and policies of these plans are reflected in day-to-day operations. Enforcement of the plans comes in a variety of ways, including specific land-use regulations, which involve the application of county, state and federal ordinances, and the review and processing of development projects.

The Department continuously processes a significant number of land use permit applications on a daily basis. The Department's Fiscal Year 2021 Annual Report indicates that more than 7,600 permits and reviews were processed. The following provides an overview of some of the different types of permits administered by the Department and how conformance and implementation of General Plan policies and actions are applied in each.

### **A. Discretionary Permits.**

The General Plan documents are enforced through the review and approval, conditional approval, or denial of a variety of discretionary land-use permits. Certain state and county laws require "consistency" with the plans when granting discretionary permits. The Department and the Maui, Moloka'i, and Lāna'i Planning Commissions are charged by certain laws to review applications and, in many cases, to require consistency with the General Plan. Permits may be approved, approved with conditions, or denied on the basis of following the plans. The following identifies the most common permits and how they are reviewed in accordance to the plans.

- 1. Special Management Area permits.** The State Coastal Zone Management law is provided by Chapter 205A, Hawaii Revised Statutes (HRS). The Special Management Area (SMA) is established under this law beginning at Section 205A-21, HRS, and is intended to regulate "development." Section 205A-26(2), HRS, states in part:

- (2) No development shall be approved unless the authority has first found:

- (C) That the development is consistent with the county general plan and zoning. Such a finding of consistency does not preclude concurrent processing where a general plan or zoning amendment may also be required.

SMA permits for developments are divided into "minor" and "major" permits. Minor permits are generally those having a valuation of \$500,000 or under and have been concluded to have no significant or cumulative environmental impacts. The authority for minor permits on Maui and Lānaʻi is delegated to the Planning Department, and on Molokaʻi to the Molokaʻi Planning Commission; these agencies can approve, approve with conditions, or deny a permit application. Major permits are generally those having a valuation over \$500,000 or that may have a significant environmental effect. Major permits require a public hearing and are approved, approved with conditions, or denied by the respective island's planning commission. Exemptions from SMA permit requirements can be issued when the proposed activity and/or structure is deemed not to be a development and has no potential negative impacts. In FY 2021, the Department processed 410 SMA exemptions, minor, major and emergency permits. Ten of those were major applications, 93 were minor permits, and 14 were emergency permits, all of which had to be consistent with the General Plan. In addition, the Department processed 12 permit modifications, one Shoreline Setback Variance, 66 Shoreline Setback Approvals, and four Shoreline Setback determinations, which also require plan consistency.

**2. County Special Use Permits.** County Special Use permits are reviewed under the requirements of Section 19.510.070, MCC, and should not be confused with State Land Use Commission Special permits. In order to grant a County Special Use permit, Section 19.510.070, MCC, requires in part:

- “A. Compliance Required. A special use permit shall comply with the provisions of this section and with the policies and objectives of the general plan and community plans of the county, the Hawaii Revised Statutes, and the revised charter of the county.
- B. Criteria for Permit. Subject to the provisions of this chapter, the appropriate planning commission shall review and, after a public hearing, may approve a request for a special use if the commission finds that each of the following criteria have been met:
  - 1. The proposed request meets the intent of the general plan and the objectives and policies of the applicable community plan of the county;
  - 2. The proposed request is consistent with the applicable community plan land use map of the county...”

County Special Use permits are approved, approved with conditions, or denied by the appropriate planning commission. In FY 2021, seven County Special Use Permits were granted with conditions.

3. **State Land Use Commission Special Permits.** Similar to Conditional Permits as noted below, compliance with the General Plan is not specifically required, but the Department requires that applicants address the plans. In FY 2021, there were five State Land Use Commission Special Permit applications submitted to the Department. These are also approved, approved with conditions, or denied by the respective island's planning commission after a public hearing. If the subject property is 15 acres or smaller, then the commission's decision stands. If the subject property is larger than 15 acres, the planning commission reviews the application and forwards it to the State Land Use Commission for a final decision.

## **B. Legislative Actions**

The various documents comprising the General Plan play a fundamental role in legislative actions before the County Council.

1. **Changes of Zoning.** Changes of Zoning are viewed as a primary means to implement long-range plans, and these are reviewed under the requirement of Section 19.510.040(A)(4), MCC. In order for the Maui County Council to grant a Change of Zoning, Section 19.510.040(A)(4), MCC, requires in part:

- a. The proposed request meets the intent of the general plan and the objectives and policies of the community plans of the county,
- b. The proposed request is consistent with the applicable community plan land use map of the county..."

In FY 2021, the Department processed one application for a zoning change. Since zoning can only be granted if the change is consistent with the community plan, sometimes accompanying Community Plan Amendments are necessary. In FY 2021, one application for a change in zoning included an application for a community plan amendment.

2. **Conditional Permits.** Conditional Permits are approved via ordinance by the Maui County Council and are reviewed under the requirements of Chapter 19.40, MCC. While compliance with community plans is not specifically required under this section of the code, the Department always requires that applicants address and analyze compliance with the Countywide Policy Plan. In FY 2021, the Maui County Council acted on one Conditional Permit application.

## **C. Subdivisions**

Subdivision review falls under the purview of the Department of Public Works and is regulated by Title 18, Subdivisions, MCC. Section 18.04.030, MCC, states in part:

“A. This title shall be applied and administered within the framework of the County general plan, community plans, land use ordinances, the Maui County Code, and other laws relating to the use of land. The director shall not approve any subdivision that is not consistent with the County general plan, community plans, State land use classification, and zoning...”

The Department, therefore, reviews proposed subdivisions and requires consistency with the provisions of the General Plan. This includes the review of lot sizes and configurations, uses and density, drainage facilities, potential uses (e.g. that there are uses in common with all applicable land use designations), interconnectivity, recreational and open spaces, and other measures as may be necessary to insure consistency with or implementation of the General Plan. In FY 2021, the Department conducted 431 subdivision reviews.

#### **D. Direct Enforcement Actions**

There are various means for the Department to directly enforce the General Plan, such as through zoning, under Chapter 19.530, MCC; the Coastal Zone Management law, under Section 205A-32, HRS; SMA Administrative Rules of each planning commission; and Administrative Rules for the Department. In the course of enforcing zoning or SMA laws, it may often be the case that a corrective action may require a discretionary permit. As described above, compliance with the General Plan is required before many of the discretionary permits can be granted. In cases where a specific land use violation cannot come into compliance with the General Plan, the activity must cease or structure(s) must be removed.

#### **E. Review of Annual Capital Improvement Program (CIP)**

As required by Section 8-8.3, Powers, Duties and Functions, of the Revised Charter of the County of Maui (1983), as amended, the Department provides the Mayor’s Budget Office with an annual analysis of the Mayor’s proposed Capital Improvement Program (CIP) budget and, though not specifically required, reviews each project for consistency with the General Plan’s policies and actions.

It is important to note that the documents within the General Plan are not to be equated with zoning. Whereas General Plan documents are intended to shape development over time and provide guidance and direction for a community, zoning is always regulatory and provides for explicit types of uses, to promote the health, safety and general welfare of the public, as called for by MCC and HRS. General Plan documents are also fluid in nature, in that priorities and circumstances can change during their lifetime. This flexibility is important to the County as a means to address the changes that occur over time which may affect the County’s vision, the availability of funding for programs, and future tools and technology that may be used to implement the General Plan.

The Department has long been aware that more could be done to implement our plans and the many actions they contain. Historically, special projects to implement the plans have been

sporadic in effort and time, and admittedly of limited effectiveness. In order to achieve more consistent and significant results, the Department initiated the formation of the Plan Implementation Division (PID) which was established in 2014. PID's purpose is to dedicate staff and resources specifically to the task of implementing our plans.

PID has been tasked with larger, significant projects that implement many actions contained in the plans. Within the last year, PID, along with consultant Orion Planning + Design, has continued its work on the MCC Title 19 Zoning Code Rewrite; assisted with land use entitlements for Hale Makua and Hale Mahaolu; proposed updates to Maui island's digital zoning map (Map 3 – pending adoption with the Council) and managed the adoption of a digital zoning map for Moloka'i. Future projects include adoption of a Maui digital zoning map (4), releasing a first draft of the Title 19 Rewrite, assisting the Current Division with various project and development applications, assisting the Long Range Division with various elements of community plan updates and the Historic Preservation Plan update, and tracking the efforts of other departments and agencies in their respective roles to implement the plans.

Thank you for your consideration of this matter. Should further clarification be necessary, please feel free to contact Kathleen Ross Aoki, Planning Program Manager, at ext. 7734.

Sincerely,

MICHELE CHOUTEAU MCLEAN, AICP
