1/10/19

Dear Chair King and Councilmembers:

SUBJECT: WELLHEAD PROTECTION OVERLAY DISTRICT (WR-18)

By Resolution 18-149, the Council requested that the Maui Planning Commission, Molokai Planning Commission, and Lanai Planning Commission review and comment on the transmitted bill, titled "A BILL FOR AN ORDINANCE AMENDING TITLE 19, MAUI COUNTY CODE, TO ESTABLISH A WELLHEAD PROTECTION OVERLAY DISTRICT."

The resolution, titled "REFERRING TO THE MAUI, MOLOKAI, AND LANAI PLANNING COMMISSIONS AND THE BOARD OF WATER SUPPLY A PROPOSED BILL AMENDING TITLE 19, MAUI COUNTY CODE, RELATING TO WELLHEAD PROTECTION," was adopted on September 7, 2018. A copy of the resolution is attached for your ease of reference.

The bill is a proposal for a land use ordinance of general applicability. Accordingly, all planning commissions had to be afforded an opportunity to review and comment on the bill prior to the Council's consideration, pursuant to Section 8-8.4 of the Revised Charter of the County of Maui (1983), as amended.

We note that the bill includes the following "Purpose and intent" clause:

Maui County recognizes that many residents rely on groundwater for their safe drinking water supply, and that certain land uses may contaminate groundwater sources. To ensure the protection of these drinking water sources, this ordinance establishes a zoning overlay district to be known as the wellhead protection overlay district ("WPOD"). The purpose and intent of the WPOD is to:

A. Protect the public's health, welfare, and safety by minimizing the risks of contamination of aquifers.

B. Preserve and protect existing and potential drinking water sources.

ONE MAIN PLAZA BUILDING / 2200 MAIN STREET, SUITE 315 / WAILUKU, MAUI, HAWAII 96793

MAIN LINE (808) 270-7735 / FACSIMILE (808) 270-7634

CURRENT DIVISION (808) 270-8205 / LONG RANGE DIVISION (808) 270-7214 / ZONING DIVISION (808) 270-7253

C. Implement land use policies consistent with the Maui County general plan and community plans.

D. Restrict and prohibit land uses with groundwater protection.

We further note Resolution 18-149 was adopted upon the recommendation of Water Resources Committee Report 18-144. The committee report includes the following passage at page 2:

A representative from the Department of Water Supply said the proposed bill could reduce the Department's expenses for treating contaminated drinking water by preventing potential contamination events around County wellheads. While State and Federal governments provide regulations for wellhead protection, the representative said enforcement of these regulations is left to the counties, who can enforce through land use regulations.

The representative explained the proposed bill establishes a wellhead protection overlay district ("WPOD") consisting of three zones around County-owned wellheads. Zone A is a 50-foot zone immediately around wellheads in which only wellhead-related activities are allowed. Zone B and Zone C are larger zones surrounding wellheads and are designated based on travel times of various contaminants, as determined by the University of Hawaii Department of Geology and Geophysics.

We advised the Water Resources Committee in a public meeting on August 1, 2018, that several General Plan ordinances support the concept of a wellhead-protection ordinance, including the Maui Island Plan, Wailuku-Kahului Community Plan, and the West Maui Community Plan. Here are excerpts from those documents:

Maui Island Plan at page 6-25:

"Complete and implement DWS wellhead-protection program to protect the water quality of public and private wells."

Wailuku-Kahului Community Plan at page 31:

"Promote and implement programs for ground water and wellhead protection."

West Maui Community Plan at page 20:

"Establish a 'Watershed Protection Overlay Plan' for West Maui and propose and adopt appropriate ordinances to implement the plan. The purpose of the overlay plan is to insure the protection of (1) the quantity and quality of drinking water supplies; (2) the quality of coastal waters and marine resources; and (3) the long term economic viability

of the community. The overlay plan should include specifications for drainage, erosion control, water conservation, wastewater reuse, and shoreline setbacks as needed to supplement existing policies and rules.”

The Department of Planning reviewed and transmitted the bill to the Lanai, Maui, and Molokai Planning Commissions, consistent with Charter requirements. The Planning Commissions conducted duly noticed public hearings and deliberated on the bill. Following is a summary of the Planning Commissions’ recommendations and comments.

<u>Body:</u>	<u>Meeting Dates:</u>	<u>Comments and Recommendations:</u>
Maui Planning Commission	November 13, 2018	<p>Recommended that the Council pass the bill. Also suggested the Council consider the following comments from individual commissioners:</p> <ul style="list-style-type: none">• Allow exemptions from development and use restrictions for land users who can prove they are safe.• Eliminate Zones B and C because they may unduly restrict development and there are questions about the County’s enforcement capabilities.• It is important to ensure the availability of clean drinking water, but there may be unintended consequences from a Wellhead Protection Overlay District.• The Department of Water Supply has demonstrated the need for this ordinance, but it is unclear whether the County is capable of enforcing it.

Molokai Planning Commission	November 14, 2018; December 12, 2018	Deferred consideration at first meeting to allow the opportunity for more public input. At second meeting, provided the following comments for the Council's consideration: <ul style="list-style-type: none">• It is unclear how the ordinance would impact the Department of Hawaiian Home Lands and DHHL homesteaders, including whether they would incur additional costs.• It is unclear how the ordinance would correlate with the Moloka'i Island Community Plan, how the ordinance would affect projected growth and water demand, and how the ordinance would impact possible future wells or demand on water resources.• It appears there has thus far been inadequate public outreach on the ordinance's terms and impacts. Consequently, there has been insufficient public awareness and comment.
Lanai Planning Commission	December 12, 2018	Recommended the Council pass the bill. Also suggested that "wellhead" be defined and that a similar bill be introduced to extend the wellhead protection overlay district to private water sources.

The Board of Water Supply met on this matter on October 18, 2018. The meeting minutes are attached.

Please see the following meeting minutes online:

Maui Planning Commission, meeting of November 13, 2018:

Resolution

No. 18-149

REFERRING TO THE MAUI, MOLOKAI, AND LANAI PLANNING
COMMISSIONS AND THE BOARD OF WATER SUPPLY A PROPOSED
BILL AMENDING TITLE 19, MAUI COUNTY CODE,
RELATING TO WELLHEAD PROTECTION

WHEREAS, the Council is considering a proposed bill to amend Title 19, Maui County Code, to add a new Chapter 19.61, relating to a Wellhead Protection Overlay District; and

WHEREAS, Sections 8-8.4 and 8-8.6 of the Revised Charter of the County of Maui (1983), as amended, require that the appropriate planning commissions review proposed land use ordinances and provide findings and recommendations to the Council; and

WHEREAS, the Council requests the Board of Water Supply also review the proposed bill and provide any findings and recommendations it may have to the Council; now, therefore,

BE IT RESOLVED by the Council of the County of Maui:

1. That it hereby refers the proposed bill, entitled "A BILL FOR AN ORDINANCE AMENDING TITLE 19, MAUI COUNTY CODE, TO ESTABLISH A WELLHEAD PROTECTION OVERLAY DISTRICT," a copy of which is attached hereto as Exhibit "A" and made a part hereof, to the Maui Planning Commission, the Molokai Planning Commission, and the Lanai Planning Commission, pursuant to Sections 8-8.4 and 8-8.6 of the Revised Charter of the County of Maui (1983), as amended; and
2. That it hereby also refers the proposed bill to the Board of Water Supply; and
3. That it respectfully requests that the Maui Planning Commission, the Molokai Planning Commission, the Lanai Planning Commission, and the Board of Water Supply

Resolution No. 18-149

transmit their respective findings and recommendations to the Council as expeditiously as possible; and

4. That certified copies of this resolution be transmitted to the Mayor, the Acting Director of Water Supply, the Planning Director, the Maui Planning Commission, the Molokai Planning Commission, the Lanai Planning Commission, and the Board of Water Supply.

07/24/18 DRAFT

ORDINANCE NO. _____

BILL NO. _____ (2018)

**A BILL FOR AN ORDINANCE AMENDING TITLE 19, MAUI COUNTY CODE, TO
ESTABLISH A WELLHEAD PROTECTION OVERLAY DISTRICT**

BE IT ORDAINED BY THE PEOPLE OF THE COUNTY OF MAUI:

SECTION 1. Title 19, Maui County Code, is amended by adding a new chapter to be appropriately designated and to read as follows:

"CHAPTER 19.61

WELLHEAD PROTECTION OVERLAY DISTRICT

Sections:

- 19.61.010 Purpose and intent.
- 19.61.020 Definitions.
- 19.61.030 Applicability.
- 19.61.040 Wellhead protection overlay district zones and map.
- 19.61.050 Regulations for Zone A.
- 19.61.060 Regulations for Zone B.
- 19.61.070 Regulations for Zone C.
- 19.61.080 Wellhead protection permits.
- 19.61.090 Best management practices.
- 19.61.100 Design guidelines.
- 19.61.110 Liability.
- 19.61.120 Interpretation of wellhead protection overlay district zone boundaries.
- 19.61.130 Enforcement.
- 19.61.140 Administrative rules.
- 19.61.150 Severability.

19.61.010 Purpose and intent. Maui County recognizes that many residents rely on groundwater for their safe drinking water supply, and that certain land uses may contaminate

groundwater sources. To ensure the protection of these drinking water sources, this ordinance establishes a zoning overlay district to be known as the wellhead protection overlay district ("WPOD"). The purpose and intent of the WPOD is to:

A. Protect the public's health, welfare, and safety by minimizing the risks of contamination of aquifers.

B. Preserve and protect existing and potential drinking water sources.

C. Implement land use policies consistent with the Maui County general plan and community plans.

D. Restrict and prohibit land uses that are incompatible with groundwater protection.

19.61.020 Definitions. The following definitions shall apply to this chapter. Terms not defined herein shall have the meanings set forth in section 19.04.040 of this title, unless the context clearly indicates a different meaning:

"Animal feeding operation" means a lot or facility (other than an aquatic animal production facility) where animals will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and where crops, vegetation forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility. Pasture operations are not animal feeding operations.

"Contamination" means an impairment of water quality by one or more of the substances regulated under the United States Environmental Protection Agency National Primary Drinking Water Regulations or under the Rules Relating to Public Water Systems pursuant to Hawaii Administrative Rules Title 11, Chapter 20.

"Dump" means a lawfully operated and privately-owned refuse disposal site.

"Hazardous material" means substances that are identified as hazardous waste by the United States Environmental Protection Agency as set forth in 40 Code of Federal Regulations Part 261 Subpart D, or designated a hazardous substance by the United States Environmental Protection Agency pursuant to 40 Code of Federal Regulations Part 302.

"Integrated pest management" means a decision-making process that considers cultural, mechanical, biological, and chemical controls of pests such as insects or rodents. Control mechanisms are selected as each situation warrants. Where chemical control is indicated, specific pest populations are targeted for treatment when they are most vulnerable rather than by general pesticide application.

"Landfill" means any sanitary landfill maintained and operated by the County.

"Primary Containment Facility" means a tank, pit, container, pipe, vessel, or area containing a liquid or chemical that is not a secondary containment facility.

"Public water system" means a water system which provides water for human consumption through pipes or other constructed conveyances if the system has at least fifteen service connections or regularly serves an average of at least twenty-five individuals daily at least sixty days out of any twelve-month period, as defined in section 11-20-2 of the Hawaii Administrative Rules. Such term includes any collection treatment, storage, and distribution facility under control of the operator of such system; and any collection or pretreatment storage facility not under such control which is used primarily in connection with such system.

"Regulated substance" means a substance regulated under the United States Environmental Protection Agency National Primary Drinking Water Regulations or under the Rules Relating to Public Water Systems pursuant to Hawaii Administrative Rules Title 11, Chapter 20.

"Release" means any unplanned or unpermitted discharge, leak, or spill of a potential contaminant including a hazardous material.

"Secondary containment facility" means a second tank, catchment pit, pipe, or vessel that limits and contains liquid or chemicals leaking or leaching from a primary containment facility.

"Sewage sludge" means any solid, semi-solid, or liquid waste generated from a municipal, commercial, or industrial wastewater treatment plant, water supply treatment plant, industrial process, or air pollution control facility exclusive of the treated effluent from a wastewater treatment plant.

"Subdivision" means a subdivision as defined in title 14, article 1, of this code.

"Time-of-travel distance" or "TOT distance" means the distance that groundwater will travel in a specified time. This distance is generally a function of the permeability and slope of the aquifer.

"Wellhead protection overlay district" or "WPOD" means the zoning district consisting of the surface and subsurface areas surrounding a water well or well field that are regulated to prevent contaminants from reaching the water well or well field, as identified on the maps entitled "Wellhead Protection Overlay District," on file in the office of the county clerk with certified copies being placed on file in the department of planning and the department of water supply. The maps shall be deemed to accompany, and are made a part of, the ordinance codified in this title, and may be amended in the same manner as any part of this title.

19.61.030 Applicability. This ordinance shall apply to wellhead protection overlay district zones as defined herein for department of water supply wells, and not to private wells. Nonconforming uses as defined in section 19.04.040 of this title are subject to the provisions of section 19.500.110 of this title.

19.61.040 Wellhead protection overlay district zones and maps. A. WPOD zones are delineated by the University of Hawaii Department of Geology and Geophysics utilizing a fixed distance for Zone A nearest to the well, and TOT distance criteria for Zones B and C using the United States Geological Survey three-dimensional numerical groundwater model MODFLOW followed by a particle tracking program MODPATH. Zone B is intended to designate a conservative estimate of the area that may contribute bacteria and viruses to the wellhead. A two-year TOT criterion is based on survival times for bacteria and viruses in soil and groundwater. Zone C is based on a ten-year TOT to allow sufficient time to implement management and remedial measures to mitigate contamination from accidental contaminant spills and other causes.

B. The WPOD zones are superimposed on all current zoning districts and identified on the maps entitled "Wellhead Protection Overlay District."

C. The WPOD zones are designated as follows with Zone A being the most restrictive and Zone C being the least restrictive:

1. Zone A - 50-foot direct chemical contamination zone. Zone A is defined as the fixed 50-foot radius around each well. The purpose of this zone is to provide protection from vandalism, tampering, or other threats at a well site.

2. Zone B - Indirect microbial contamination zone. Zone B consists of the surface and subsurface area overlying the portion of an aquifer that contributes water to the well within two years.

3. Zone C - Indirect chemical contamination zone. Zone C consists of the surface and subsurface area overlying the portion of an aquifer that contributes water to the well within ten years.

19.61.050 Regulations for Zone A. Within Zone A, necessary public utilities and facilities shall be permitted uses, including the construction, operations, maintenance, repair, and enlargement of drinking water supply-related facilities such as wells, pipelines, aqueducts, and tunnels. All other uses are prohibited. No wellhead protection permits shall be issued for parcels within Zone A.

19.61.060 Regulations for Zone B. A. Within Zone B, all uses permitted in the underlying zoning districts shall be permitted, unless a wellhead protection permit is required pursuant to subsection B of this section, or a use is prohibited by subsection C.

B. Permit required. The following uses in Zone B shall require a wellhead protection permit issued by the director of water supply pursuant to section 19.61.080:

1. Commercial automobile body or commercial automobile repair shops.

2. Car washes.
3. Cement or concrete plants.
4. Petroleum or mixed-biofuel fueling stations.
5. Fleet, trucking, or bus terminals.
6. Dry cleaners.
7. The use of pesticides rated by the United States Environmental Protection Agency as having high leachability potential, as identified on the document entitled "State of Hawaii Department of Agriculture List of Pesticides of Concern," with current copies on file with the department of water supply. This document, as may be amended by the State Department of Agriculture from time to time, shall be deemed to accompany the ordinance codified in this title, as may be amended, and is made a part of this ordinance.
8. Commercial machine shops.
9. Commercial wood preserving or treatment facilities.
10. Animal feeding operations.
11. Commercial equipment maintenance or fueling areas.
12. Hospitals.
13. Paved and unpaved parking lots with more than 20 parking spaces.
14. Waste transfer or recycling stations.
15. Any collection, handling, manufacture, use, storage, transfer, or disposal of more than fifty-five gallons of petroleum products or more than ten gallons of any other regulated substance as defined herein.
16. Subdivisions that create four or more developable lots.
17. Construction of three or more dwelling units on a single lot, parcel, or site.

C. Prohibited uses. The following uses are prohibited within Zone B:

1. Commercial electrical or electronic manufacturing facilities that utilize a regulated substance as defined herein.
2. Mortuaries or graveyards.
3. Golf courses.
4. Commercial metal plating, finishing, or fabricating facilities that utilize a regulated substance as defined herein.
5. Commercial chemical processing or storage facilities.
6. Commercial plastics or synthetic production facilities that utilize a regulated substance as defined herein.
7. Commercial junk, scrap, or salvage yards.
8. Mines.
9. Landfills or dumps.
10. Injection wells, dry wells, or sumps on non-residential properties.

11. Irrigation with reclaimed wastewater classes R-2 and R-3.
12. Sewage sludge land applications.
13. Commercial slaughterhouses.
14. Wastewater percolation ponds.

19.61.070 Regulations for Zone C. A. Within Zone C, all uses permitted in the underlying zoning districts shall be permitted, unless a wellhead protection permit is required pursuant to subsection B of this section, or a use is prohibited by subsection C.

B. Permit required. The following uses in Zone C shall require a wellhead protection permit issued by the director of water supply pursuant to section 19.61.080:

1. Commercial automobile body or repair shops.
2. Petroleum or mixed-biofuel fueling stations.
3. Fleet, trucking, or bus terminals.
4. Dry cleaners.
5. Golf courses.
6. Commercial machine shops.
7. Commercial wood preserving or treatment facilities.
8. Animal feeding operations.
9. Commercial equipment maintenance or fueling areas.
10. Any collection, handling, manufacture, use, storage, transfer or disposal of more than fifty-five gallons of petroleum products or more than ten gallons of any other regulated substance as defined herein.
11. Subdivisions that create four or more developable lots.
12. Construction of three or more dwelling units on a single lot, parcel, or site.

Prohibited uses. The following uses are prohibited within Zone C:

1. Commercial electrical or electronic manufacturing facilities that utilize a regulated substance as defined herein.
2. Commercial chemical processing or storage facilities.
3. Commercial plastics or synthetic production facilities that utilize a regulated substance as defined herein.
4. Commercial junk, scrap, or salvage yards.
5. Commercial metal plating, finishing, or fabricating facilities that utilize a regulated substance as defined herein.
6. Mines.
7. Landfills or dumps.
8. Injection wells, dry wells, or sumps on non-residential properties.

9. Wastewater percolation ponds.

19.61.080 Wellhead protection permits.

A. Wellhead protection permit applications shall be submitted to the director of water supply and shall include:

1. The name, address, and phone number of the applicant who will be responsible for implementation of best management practices.
2. Verification of property ownership and authorization by all property owners if the applicant is not the sole owner of the subject property.
3. The tax map key of the project site.
4. A plot plan showing the project location on the parcel.
5. A description of the proposed use, including names and quantities of any regulated substances collected, handled, manufactured, used, stored, transferred, or disposed of at the project site.
6. A best management practices plan addressing all activities subject to the wellhead protection permit.
7. Additional information as may be requested by the director of water supply.

B. Permit processing

1. Upon receipt of a complete application, the director of water supply shall approve or deny the application pursuant to the requirements of this chapter, and may impose conditions upon the proposed use to ensure that the purpose and intent of this chapter are met. If a complete application does not meet the requirements of this chapter, it shall be denied.

2. An initial permit shall be valid for a period of up to five years. Subsequent permit renewals and permit amendments may be granted by the director of water supply for longer duration. In reviewing applications for renewals, the director of water supply shall require evidence of compliance with applicable best management practices and any other permit conditions.

3. All permits and renewals shall contain a provision for inspection at reasonable times and upon presentation of appropriate credentials.

C. Revocation and appeal. A wellhead protection permit may be revoked at any time and an application for permit renewal may be denied by the director of water supply if the permit terms and conditions have been violated or if the requirements of this chapter have not been met. Appeals of permit denials, revocations, or non-renewals, or alleging errors, shall be heard and determined by the board of variances and appeals pursuant to chapter 19.520 of this title.

19.61.090 Best management practices. The following standards shall apply to uses in Zones B and C of any WPOD:

A. Any collection, handling, manufacture, use, storage, transfer, or disposal of more than fifty-five gallons of petroleum products or more than ten gallons of any regulated substance as defined herein, must have a secondary containment facility which shall be easily inspected and whose purpose is to intercept any leak or release from the primary containment facility.

B. An animal feeding operation shall meet the minimum requirements for operation set forth in the "Guidelines for Livestock Waste Management" prepared by the University of Hawaii at Manoa Cooperative Extension Service, College of Tropical Agriculture and Human Resources, dated January 19, 2010, as may be amended.

C. The irrigation of crops shall follow integrated pest management in accordance with the United States Department of Agriculture Natural Resources Conservation Service Technical Guide dated 1989, as may be amended.

D. Subdivisions that create four or more developable lots in unsewered areas that serve more than one residential unit per acre shall install aerobic treatment units or alternative treatment units achieving equal or higher level of wastewater treatment than aerobic treatment units.

E. Parking lots shall be maintained on a yearly basis, including cleaning catch basins and sweeping and sealing cracks. Runoff from parking lots shall be diverted to storm water drains.

F. Waste transfer or recycling stations shall have an operating manual to ensure that only clean, marketable recyclables are collected. Storage of residuals shall be accomplished to prevent spillage and leaking.

G. Golf course development shall meet best management practices for use of nutrients and pesticides as set forth in "Golf Course Management Measure," Hawaii's Coastal Nonpoint Pollution Control Program Management Plan, dated June 1996, as may be amended.

H. Construction activities shall be in accordance with chapter 20.06 of this code and the following standards:

1. There shall be a designated person on site during construction activities who shall be responsible for supervising the use, storage, and handling of hazardous material and who shall take appropriate mitigating actions necessary in the event of fire or spill.

2. Hazardous materials left on site when the site is unsupervised must be inaccessible to the public. Locked storage sheds, locked fencing, locked fuel tanks on construction vehicles, or other techniques may be used if they will prevent access.

3. Construction vehicles and stationary equipment that are found to be leaking fuel, hydraulic fluid, or other hazardous materials shall be removed from the site and from

any wellhead protection overlay district zone. The vehicle or equipment may be repaired in place, provided the leakage is completely contained.

4. Hazardous materials shall not be allowed to enter stormwater systems.

19.61.100 Design guidelines. Upon issuance of the appropriate wellhead protection permit for parcels in Zone B or C, the following design guidelines shall apply to subdivisions that create four or more developable lots, and to the construction of three or more dwelling units on a single lot, parcel, or site:

1. Proposed development and uses shall be located as far from the wellhead as feasible.

2. Storm-water infiltration basins shall be located outside the WPOD where feasible, provided that if this is not feasible, then the basins shall be located as far from the wellhead as feasible.

3. Active parks and schools shall implement integrated pest management.

4. If a development or use is proposed on property which is partially within a WPOD, the proposed development or use shall be located to the maximum extent feasible on the portion of the property that is outside the WPOD.

19.61.110 Liability. Nothing in this ordinance shall be construed to imply that the County has accepted any of an owner or developer's liability if a permitted facility or use contaminates groundwater in any aquifer.

19.61.120 Interpretation of wellhead protection overlay district zone boundaries.

A. If parts of a parcel lie within one or more of the delineated zones of the WPOD, each part shall be governed by the restrictions applicable to the zone in which the part is located.

B. Where the boundary between two WPOD zones passes through a facility, the entire facility shall be considered in the more restrictive zone.

C. Where a facility, or portion thereof, is overlapped by delineated WPOD zones of different wells or well fields, the more restrictive zone shall apply.

19.61.130 Enforcement. Any violation of this chapter shall be enforced pursuant to chapter 19.530 of this title, and through revocation or non-renewal as prescribed herein.

19.61.140 Administrative rules. The planning director and the director of water supply may adopt administrative rules regarding the administration of this chapter, pursuant to chapter 91, Hawaii Revised Statutes.

19.61.150 Severability. Should any section or provision of this ordinance be declared invalid, such decision shall not affect the validity of the ordinance as a whole or any other part thereof. A determination that any portion or provision of this wellhead protection overlay district is invalid shall not invalidate any permit previously issued hereunder."

SECTION 2. This ordinance shall take effect upon its approval.

APPROVED AS TO FORM
AND LEGALITY:

EDWARD S. KUSHI, JR.
First Deputy Corporation Counsel

DRAFT

COUNCIL OF THE COUNTY OF MAUI

WAILUKU, HAWAII 96793

CERTIFICATION OF ADOPTION

It is HEREBY CERTIFIED that RESOLUTION NO. 18-149 was adopted by the Council of the County of Maui, State of Hawaii, on the 7th day of September, 2018, by the following vote:

MEMBERS	Michael B. WHITE Chair	Robert CARROLL Vice-Chair	Alika ATAY	Eleanora COCHRAN	S. Stacy CRIVELLO	Donald S. GUZMAN	G. RIKI HOKAMA	Kelly T. KING	Yuki Lei K. SUGIMURA
ROLL CALL	Aye	Excused	Aye	Aye	Aye	Aye	Aye	Aye	Aye

COUNTY CLERK

BOARD OF WATER SUPPLY
COUNTY OF MAUI

REGULAR MEETING
MINUTES OF OCTOBER 18, 2018

The regular meeting of the Maui County Board of Water Supply was held at the Department of Planning Conference Room, 250 South High Street, Wailuku, Maui, on Thursday, October 18, 2018.

CALL TO ORDER

The meeting was called to order by Chair Lyons at 1:30 p.m.

ATTENDANCE

Members present: Anders Lyons, Chair
Shay Chan Hodges, Vice Chair
R. Raymond Cabebe
Dean Frampton
Norman Franco
Zoltan Milaskey
Michael Nakashima

Members excused: Joseph Aquino
Sylvia Ho

Staff present: Alex DeRoode, Planner VI
Benjamin "Alex" Buttaro, Planner IV
Edward S. Kushi, Jr., First Deputy Corporation Counsel
Gaye Hayashida, Commission Support Clerk

APPROVAL OF MINUTES

Minutes of September 20, 2018

Chair Lyons asked for a motion to approve the minutes of September 20, 2018.

Motion: Member Milaskey moved to approve the minutes of September 20, 2018

Second: Member Nakashima

Discussion: None

Vote: Unanimous. Motion carried. The minutes of September 20, 2018 were approved.

PUBLIC TESTIMONY

There was no public testimony.

UNFINISHED BUSINESS

Discussion and possible action regarding the Maui Island Water Use and Development Plan

Discussion on proposal for District Water Use and Development Plan Public Hearings

Chair Lyons informed the members that they cannot meet any sooner than 30 days after a notice is published in the Maui News. He was hoping to get most of meetings done in November but it looks like that is not going to happen.

The chair asked if the board could get an extension on the 180-day period and Mr. Kushi replied that the 180-day review period is for the board to hold public meetings to get input on the plan. And based on the public input the board then forwards their comments to the department. The department then sends the plan with the board's comments to the county council.

Vice Chair Chan Hodges explained that the notice to the public should be clear that the board is not going to present information again at these meetings. These meetings are to get feedback from the community about the plan that is online. This should be made clear to the public and what staff will be presenting is what is in the plan for that particular district.

Mr. Kushi added that there will be a court reporter at these meetings so there will be recorded testimony to refer back to.

Chair Lyons explained that staff suggested the following 5 districts:

Kahului/Wailuku District
Kihei District
Lahaina District
Hana District
Upcountry District

The chair asked Mr. Kushi if he could poll the members outside of a meeting for member availability for these hearings. Mr. Kushi stated yes, he is allowed to do so.

Mr. Kushi suggested that a notice listing the date, time and location of all the meetings could be published at least 2 times in the newspaper. He mentioned that if the Water Resources and Planning Division had a mailing list of attendees from

Board of Water Supply
Minutes of October 18, 2018

their own community meetings then the notice of the Board's public meetings could be mailed out or emailed to these people.

Mr. Kushi noted that to have a meeting you need a quorum. But if there is no quorum, Sunshine Law does state the meeting can proceed to receive testimony but no interaction with the testifiers is allowed. This would turn the public hearings into a "TIG" (temporary investigative group) and add another couple of months to the process, so the board should try to make sure there is a quorum at each meeting.

The board members agreed that the Hana meeting will be the first meeting for the week of November 26th and then working towards the Central area will be the rest of the meetings. The following week in December would finish the last of the meetings.

Member Franco suggested that they should carpool or have ground transportation provided so that no one will be driving in and out on their own.

Discussion on Draft Updates as submitted from the Commission on Water Resource Management Staff

Mr. De Roode noted that CWRM staff submitted some changes but these changes have been for formatting and presenting the data a little differently but there were no substantive changes. These changes do not affect the strategies.

Discussion and possible action regarding Water Rates Including Agriculture Water Rates

This is a standing agenda item. Chair Lyons noted that the department has asked this board not to pursue this matter yet as staff is still in discussion with the council.

OTHER BUSINESS

Discussion and possible action regarding Maui County Council's Resolution No. 18-149, Referring to the Maui, Molokai, and Lana'i Planning Commissions and the Board of Water Supply A Proposed Bill Amending Title 19, Maui County Code, Relating to Wellhead Protection

Mr. Kushi stated that this was submitted to the planning commissions because it is a Title 19 issue, a zoning matter. This is a zoning overlay ordinance so it has to go to the planning commissions. He believes this issue is out of the Board's hands. The council has reviewed this and has pushed it to the planning commissions so the process has started. He recommended that the Board "leave well enough alone" because the plan is being processed.

Chair Lyons agreed and said that this matter will be deferred to "some later" date.

Receipt of Board Member request for agenda items to be placed on future agendas

1. Upcountry Meter List, specifically are there county resources (funds) to help applicants with the cost of doing the improvements required by the DWS. This will be placed on November agenda
2. Division Reports - have staff provide an overview of these reports, specifically what the reports mean.
3. Engineering staff to report on how the department can give out more meters.
4. Upcountry meter list progress as a standing agenda item to be placed under Director's Report.
5. Temporary construction meters for the use of dust control to be placed on November agenda.

DIVISION REPORTS

September Division Operational Reports

This matter was deferred to the next meeting

ADJOURNMENT

There being no further business the regular meeting was adjourned at 2:30 p.m.
