Subject: Recycling programs

Aloha,

My name is Briana Hurley I'm a Lahaina resident. I'm very shocked to learn that recycling programs around the island are being cut because of lack of funding. The other day I drove by the airport and couldn't not notice the monstrosity of a fake waterfall that tax payers footed the bill for. That is so hewa. Without these recycling programs, more corrosive and dangerous chemicals will be poured down the drain into the ocean, and all kinds of batteries and things will leech into the water table from the dump. Do I really need to make people in charge of budget aware of these things? Is it not common sense? Stop being wasteful please and make a positive impact. We the people will remember what you do.

Briana Hurley
