BUDGET AND FINANCE COMMITTEE

September 2, 2016

Committee
Report No. _____

Honorable Chair and Members
of the County Council
County of Maui
Wailuku, Maui, Hawaii

Chair and Members:

Your Budget and Finance Committee, having met on August 16, 2016, makes reference to County Communication 16-147, from the Director of Finance, transmitting a proposed resolution entitled "APPROVING THE ACQUISITION OF 4 LOTS IN THE HAIKU SUGAR EAST SUBDIVISION AT HAIKU, MAUI, HAWAII."

The purpose of the proposed resolution is to approve the acquisition of four lots in the Haiku Sugar East Subdivision from landowner Alexander and Baldwin, LLC ("A&B") comprising 267.74 acres, as follows: Lot 1, identified for real property tax purposes as tax map key (2) 2-7-007:079, 182.44 acres; Lot 3, tax map key (2) 2-7-007:081, 33.84 acres; Lot 4, tax map key (2) 2-7-007:082, 37.95 acres; and Lot 5, tax map key (2) 2-7-007:083, 13.51 acres, Haiku, Maui, Hawaii ("Properties"). Land acquisition and related costs total \$9,495,000.

At the request of the Chair of your Committee, the Department of the Corporation Counsel transmitted a revised proposed resolution, entitled "APPROVING THE ACQUISITION OF FOUR PARCELS TOTALING APPROXIMATELY 267.7 ACRES AT KUIAHA, HAMAKUALOA, MAUI, HAWAII," approved as to form and legality, incorporating property descriptions consistent with a Fiscal Year 2017 Budget appropriation and non-substantive revisions.

Your Committee notes the Council initiated the acquisition by appropriating \$9,500,000 in the Fiscal Year 2017 Budget from the Open Space, Natural Resources, Cultural Resources, and Scenic Views Preservation Fund for land acquisition and related costs for the Properties. Expenditures from the Fund are subject to Charter Section 9-19 and Chapter 3.88, Maui County Code, which restrict the uses of land purchased with money from the Fund.

Report No. _____

Hundreds of people submitted written testimony and testified at your Committee's meetings on the budget for Fiscal Years 2016 and 2017, supporting an appropriation for acquisition of the Properties. Many people testified supporting the resolution to acquire the Properties. The testimony supported the acquisition for open space and preservation purposes. The Properties include culturally significant sites as well as several hiking trails, and overlook the popular Jaws surfing location.

Your Committee inquired about access to the Jaws Lookout and ocean access. A representative of A&B clarified the Jaws Lookout is located on property owned by A&B located next to Lot 1 and a public access easement to the Lookout is recorded on the property. The representative also said the ocean may be accessed through the Jaws Lookout or Lot 5. Your Committee noted the ocean may also be accessed through Lot 4.

Your Committee discussed management plans for the Properties. The Managing Director stated the Department of Parks and Recreation will have main oversight of the Properties, and the Office of the Mayor may also be involved. The Deputy Director of Parks and Recreation said the Department has not been consulted up to this point. The Deputy Director said she would obtain A&B's existing management plan and identify any partners involved.

Because of concerns raised regarding management plans for the Properties, your Committee recommended referring the matter regarding use of the Properties to your Economic Development, Energy, Agriculture, and Recreation Committee.

Your Committee expressed concern regarding the Properties' infrastructure. The Budget Director stated the Properties are number 1,379 on the Department of Water Supply's Upcountry water meter priority list. A representative of A&B stated A&B has discussed with the Office of the Mayor possible use of Haiku Ditch water that runs through Lot 1. The A&B representative also said there is no electrical, telephone, or sewer service on the Properties.

Your Committee raised general liability concerns regarding the County's acquisition of the Properties. A representative from A&B confirmed there is a Phase I environmental report for the Properties, indicating there are no hazardous materials. The representative also said there are no structures on the Properties. The Budget Director said there are access gates on the Properties which would provide some security.

Your Committee also expressed concern about the possible impact the purchase price of these Properties may have on the value of other agricultural properties. Your Committee notes that quickly inflated values of agricultural properties could impact the viability of agriculture in the County.

Your Committee voted 8-0 to recommend adoption of the revised proposed resolution; referral of the use of the Properties to your Economic Development, Energy, Agriculture, and Recreation Committee; and filing of the communication. Committee Chair Hokama, Vice-Chair White, and members Baisa, Carroll, Cochran, Couch, Crivello, and Guzman voted "aye." Committee member Victorino was excused.

Your Committee is in receipt of a further revised proposed resolution, approved as to form and legality by the Department of the Corporation Counsel, revising Exhibit "1" to the resolution.

Your Budget and Finance Committee RECOMMENDS the following:

1. That Resolution _____, as revised herein and attached hereto, entitled "APPROVING THE ACQUISITION OF FOUR PARCELS TOTALING APPROXIMATELY 267.7 ACRES AT KUIAHA, HAMAKUALOA, MAUI, HAWAII," be ADOPTED;
2. That the matter relating to the use of the Properties be REFERRED to your Economic Development, Energy, Agriculture, and Recreation Committee; and
3. That County Communication 16-147 be FILED.

Dear Mr. Agasalog:

In accordance with your request I have prepared the following appraisal report which establishes the market value of four vacant land parcels within the Haiku Sugar East Subdivision in Pauwela, Maui, Hawaii. The final value estimates are based on the on-site inspection of the subject properties; determination of highest and best use; review of comparable land transactions in the market, and a review of current economic and financial conditions.

Based upon my research and study, the estimated market value of the subject parcels, as of June 17, 2016, subject to the "Certification" and "Assumptions and Limiting Conditions", were as follows:

Tax Map Key	Land Area	Estimated Fair Market Value
(2) 2-7-7-79	182.443 Acres	\$4,105,000
(2) 2-7-7-81	33.844 Acres	\$2,150,000
(2) 2-7-7-82	37.951 Acres	\$2,131,000
(2) 2-7-7-83	13.514 Acres	\$1,398,000

The following appraisal report presents a *summary review* of the appraisal and my analysis of data along with other pertinent materials on which the estimate of value is predicated. Thank you for the opportunity to work on this interesting assignment.

PART I – INTRODUCTION

APPRAISAL DEVELOPMENT AND REPORTING PROCESS

This is an appraisal report which is intended to comply with the reporting requirements set forth under Standards Rule 2-2(a) of the Uniform Standards of Professional Appraisal Practice. This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, and statement of assumptions and limiting conditions, extraordinary assumptions and hypothetical conditions, and certifications contained in the appraisal.

SCOPE OF WORK

The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report, including the following definition of market value, extraordinary assumptions and hypothetical conditions, statement of assumptions and limiting conditions, and certifications as contained in the report. The appraiser has at a minimum performed a complete visual inspection of the observable areas of the subject properties, considered the neighborhood and its characteristics, viewed each of the comparable sales, and researched, verified and analyzed data from public and/or private sources that were deemed to be reliable. An analysis of Highest and Best Use was conducted as though the site was vacant and available for development and this conclusion was the basis upon which our valuation was derived. Finally, the analysis, opinions and conclusions were reported in this appraisal report.

PURPOSE AND INTENDED USE OF THE APPRAISAL

The purpose of this appraisal, as of June 17, 2016, is to estimate the fee simple market value of four vacant land parcels ("*subject parcels*") identified as follows:

Tax Map Key	Location	Lot No.	Land Area
(2) 2-7-7-79	Hana Highway, Haiku	1	182.443 Acres
(2) 2-7-7-81	Hana Highway, Haiku	3	33.844 Acres
(2) 2-7-7-82	Nahele Road, Haiku	4	37.951 Acres
(2) 2-7-7-83	Nahele Road, Haiku	5	13.514 Acres

The Intended use of this report is to provide real property information, real estate market data, and informed value conclusions to facilitate a purchase of the subject vacant land parcels by the County of Maui.

Definition of Fee Simple¹

"Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat".

¹ The Dictionary of Real Estate Appraisal, 6th Edition, Appraisal Institute, 2015

Definition of Market Value²

"The most probable price, as of a specified date, in cash, or in terms equivalent to cash, or in other precisely revealed terms for which the specified property rights should sell after reasonable exposure in a competitive market under all conditions requisite to a fair sale, with the buyer and seller each acting prudently, knowledgeably, and for self-interest, and assuming that neither is under undue duress".

INTENDED USER

The County of Maui (Client) and their assigns are the only authorized users of this report. Any other use by any other person or entity for any other purpose, without exception, is explicitly unauthorized.

PROPERTY INSPECTION/DATE OF REPORT/EFFECTIVE DATE

The subject property was physically inspected by Ted Yamamura on June 17, 2016. The date of this appraisal report and the effective date of valuation is June 17, 2016.

SPECIAL ASSUMPTIONS AND CONDITIONS

(1) At the time of inspection of the subject properties, the property pins and boundary markers were not visible to the Appraiser. As such, the approximate boundaries viewed by the Appraiser are assumed to be correct. It is also assumed that there are no encroachments between the subjects and their adjacent properties.

(2) Values estimated in this report are based on the assumption that the properties are not negatively affected by the existence of hazardous substances or detrimental environmental conditions. Since the Appraiser is not an expert in the detection of such substances and conditions, it is possible that tests and inspections made by a qualified environmental expert would reveal the existence of hazardous materials and detrimental environmental conditions on or around the property that would negatively affect its value.

² The Dictionary of Real Estate Appraisal, 6th Edition, Appraisal Institute, 2015

PART II – FACTUAL DATA

NEIGHBORHOOD DESCRIPTION

The subject parcels are located in Haiku. The Haiku neighborhood is located along the northern shoreline of Maui between the urban center of central Maui and the rural area of Hana. As designated by the County of Maui, Haiku is part of the Paia-Haiku Community Plan region. The Haiku area includes the communities of Haiku, Pauwela, and Kuiaha. The topography rises from sea level up to elevations approaching 1,500 feet.

The countryside is often intersected by valleys or gulches draining the upper elevations of the dormant volcano Mount Haleakala. These valleys frequently have year round or at least seasonal streams. The cool and moist climate is created by the prevailing trade winds from the North East. These prevailing trade winds keep the area green and lush with cooling breezes and showers.

Haiku is more rural in character with small urban nodes at Kuiaha, Haiku and Pauwela to service residents in the outlying rural and agricultural areas. Light industrial activities have also grown and now occupy several renovated facilities that were once pineapple canneries. Agricultural activities include pineapple cultivation, nursery operations, and diversified agriculture. The public infrastructure in the Haiku area is more limited.

Once a large agricultural-based community, Haiku has developed into an upscale rural residential community. Over the past twenty years, most of the residential growth in this area is a result of new subdivisions developed on agricultural lands. Recent residential developments have also led to an increased amount of oceanfront estates lining the cliffs of Haiku.

Although rural settlements are scattered throughout the region, Haiku does have businesses that help to alleviate against the need to drive to Central Maui. Many of these businesses are family-managed. Typical of the outlying east Maui area is the absence of public utilities; however, also typical of the area is electricity by windmill or photovoltaic systems, and domestic water by catchment, wells or from fresh water springs and streams. There are no readily apparent adverse reaction or affect on marketability of properties in the east Maui area due to the limited access to public utilities.

Agriculture, conservation, rural and interim zoning are predominant in this neighborhood. The neighborhood contains a mixture of large agriculture zoned and cultivated parcels, half-acre (rural zoned) parcels, and numerous small single family residential subdivisions. Additionally, improvements on the properties may range anywhere from older 60+ year old dwellings to newly constructed custom quality and architecturally designed executive homes. Land areas vary from smaller 1,000 square foot parcels to large 1,000 acre tracts.

<i>Access</i>	Access is from Hana Highway. Hana Highway is the primary public roadway servicing the greater east Maui region.
<i>Easements and Restrictions</i>	Utility easement has no readily apparent adverse affect on the subject site. There were no other readily apparent or known adverse conditions or encroachments affecting the subject site. Values estimated in this report are based on the assumption that the properties are not negatively affected by the existence of hazardous substances or detrimental environmental conditions. Since the Appraiser is not an expert in the detection of such substances and conditions, it is possible that tests and inspections made by a qualified environmental expert would reveal the existence of hazardous materials and detrimental environmental conditions on or around the property that would negatively affect its value.

	No archeological, historical, engineering, soils, topographic, drainage, or wetland studies were provided to the Appraiser which may have an impact on the final value estimate. It is therefore assumed that there are no detrimental conditions concerning these factors which may influence the final value estimate.

PART III – DATA ANALYSIS AND CONCLUSIONS

HIGHEST AND BEST USE

The reasonably probable use of property that results in the highest value. The four criteria the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity.³

Since the appraisal of the subject properties are based on a particular premise of use, the highest and best use analysis determines just what this premise of use should be. The primary consideration in the analysis of the highest and best use of the subject properties is the site as if vacant and available for development

Legal Permissibility

The subject parcels are presently zoned Agriculture and designated in the Paia-Haiku Community Plan for Agriculture use. The underlying zoning and community plan designation provides for a relatively wide spectrum of permitted uses and does not place a significant restriction on the potential use of the property.

Physically Possibility

The physical aspects of the site impose the first constraint on any possible use of the property. The Appraiser has not been provided with soil or subsoil or other engineering studies to determine the load-bearing capacity of the subject parcel. However, based on our knowledge of other properties in the immediate vicinity, the site is presumed to have stable soil conditions and drainage problems, if any, are assumed to be correctable. The parcels have sufficient acreage land areas, adequate roadway access, and private or public utilities are reasonably available. Based on the physical aspects of the site, and assuming the land is not subject to unusual soil conditions, a wide variety of agriculture and residential uses would be possible.

Financial Feasibility

The test of financial feasibility involves an analysis of the likelihood of the use producing an income, or return, greater than the combined income needed to satisfy operating expenses, financial expenses, and capital amortization. All uses that are expected to produce a positive net income or rate of return are considered to be financially feasible.

The subject parcels are located within an established rural neighborhood in Haiku, and are oceanfront parcels. The demand for vacant, oceanfront land in east Maui has continued to be strong due to the limited number of acreage oceanfront properties available for private ownership.

Therefore, it is the Appraiser's opinion that development of the sites as an oceanfront residential estate would provide a net return to the land and would therefore be considered feasible.

³ The Dictionary of Real Estate Appraisal, 6th Edition, Appraisal Institute, 2015

Maximum Productivity

In the final analysis, a determination must be made as to which feasible use is the highest and best use of the parcel as if vacant. The maximally productive use of the site is that use among all of the financially feasible uses that provides the highest rate of return, or value. Based upon our analysis of the property's current zoning, locational and physical attributes of the sites, it is the Appraiser's opinion that an oceanfront residential estate would maximize the return on the land.

Conclusion of Highest and Best Use

These conclusions are based upon the analysis of the site's locational and physical attributes, current zoning, the complementary nature of the neighboring properties, and current economic and market conditions. Therefore, the highest and best use of the subject parcels, as vacant and available, would be oceanfront-estate, rural-residential use.

THE APPRAISAL PROCESS – VALUATION OF VACANT LAND

The generally accepted methods of land valuation include the following:

Sales Comparison Approach

The Sales Comparison Approach involves comparison of similar vacant properties which have recently sold.

Allocation

The Allocation method of estimating land value is based on the development of a typical ratio of site value to total property value through an analysis of sales of improved properties.

Extraction

The extraction method of estimating land value involves the deduction of depreciated improvement costs from the sale prices of improved properties which have recently sold. The contribution of the improvements to the improved property is deducted from the total sale price of value to arrive at an estimated sale price of value of the land.

Capitalization of Ground Rent

Capitalization of Ground Rent is a procedure typically used to estimate the value of a leased fee estate. In estimating land value, the annual ground rent is capitalized at the land capitalization rate resulting in an indication of land value.

Land Residual Technique

The Land Residual Technique involves the application of a land capitalization rate to the estimated residual income attributable to land, for improved income producing properties.

Development Procedure

The Development Procedure involves the estimation of individual lot values, as if the land were subdivided, and subtracting total development costs from the aggregate values of the individual lots.

Conclusion

The most commonly accepted approach for land valuation is the direct comparison of the subject land with sales of other land parcels in the market. When the availability of data permits its use, this analytical method produces an indication of what the purchaser-investor would most probably have to pay for the same rights in existing substitute properties on the same market, as of the effective date of the appraisal. Consequently, the Sales Comparison Approach was concluded to be the most desirable methodology in the valuation of the subject parcels.

Application of the Sales Comparison Approach

Proper application of the Sales Comparison Approach requires knowledge of the standards of the local market plus a detailed property inspection and personal observation. The ability to interpret land characteristics are necessary together with knowledge and experience of typical buyer preferences and price reactions in the local market. Finally, the application of sound judgment is required to produce reasonable results.

The Sales Comparison Approach involves the comparison of comparable properties that have recently sold with the subject property. The subject property is the "standard" upon which all comparisons and adjustments are made. Because no two properties are ever truly identical, the prices of the market indicators must be reduced to various units of comparison to reflect the value of the subject property. Typically, the variations in sales prices reflect differences in size, location, zoning, time and terms of sale, and the physical characteristics of the land.

The value indication is developed using a unit of comparison in which the type of site being appraised is typically bought and sold on the market. In this assignment, the price per acre was considered the most appropriate unit of comparison due to the varying sizes of the comparable land sales as compared to the subject parcels.

Primary criteria utilized in the market research and selection of vacant land comparables included consideration of the following factors:

- Relatively recent transaction date, location with the same or competing neighborhood, and similar community characteristics
- Similarity in size area and/or zoning and permitted land use/density, topographic features, public utilities, access, and view amenities

Discussion and Comments on Market Data

Typical of agriculture neighborhoods are the wide differences in property types in terms of size, location, climate, terrain and soil types, and due to this wide spectrum of property types, it is difficult to select and analyze truly similar property sales. When evaluating agricultural properties, it is customary practice to utilize available property sales regardless of the dissimilarities with the subject in order to estimate value since there are a limited number of acreage property transactions that share similar characteristics as the subject.

Research commenced with a search of similar oceanfront, acreage land sales in the subject's immediate neighborhood, and expanded to include competitive neighborhoods throughout the entire east Maui region. Based upon this research, and despite the considerable comparable parcel size differences and older transaction dates, the vacant land comparables selected and utilized in the Site Valuation Worksheet represent the most reasonably recent and competitive transactions of acreage, oceanfront parcels available for market comparison. The land comparables and adjustments to reflect variations in the properties are contained in **Tables 1 - 4**.

Description of Adjustments

Market Conditions (Time Adjustment): The four comparable land sales transacted between 2013 and 2015. In order to determine the extent of market change over time, MLS statistical information of single family and multi-family residential sales throughout the entire island of Maui were utilized since they represented a credible population of sales. Based upon MLS statistical information, property values on the island of Maui increased by approximately 20% over 3 years between the period 2013 through 2015. Based upon the MLS statistical information, appropriate positive time adjustments were applied to reflect positive market changes over time.

Location: The subject parcels and all comparable land sales are located within competitive rural neighborhoods in east Maui and no adjustments were warranted.

Access/Utilities: The availability of utilities, specifically electricity and water determines the potential of land development. The subject and comparable land sales have similar roadway access and therefore no adjustments were applied.

The subject parcels have access to public electricity; however, there are no public or private water supply on the sites nor readily available. Comparable land sales 1 and 3 are similar to the subject and no adjustments were required; however, comparable land sales 2 and 4 have both electricity and water available. In order to adjust for the subject's lack of water supply, a matched-pairs analysis was conducted to determine the difference in value between vacant acreage parcels with and without water. Based upon this analysis, it was concluded that acreage parcels in the east Maui areas without water were approximately 25% less in value than parcels with water. Thus, negative 25% adjustments were applied to comparable land sales 2 and 4.

Zoning: Zoning determines land uses and density. The subject parcels and all comparable land sales are similarly zoned and no adjustments were required.

Physical Characteristics: Lots 4 and 5 have very irregular parcel shapes that would likely affect ease of use of the properties. The four comparable land sales have more traditional rectangular shapes or shapes more conducive to ease of parcel use, and therefore negative adjustments were appropriate.

Size: The land sales ranged in parcel sizes and typically the larger the parcel the lower the price per acre and the smaller the parcel the higher the price per acre. Therefore, size can affect the purchase price. In order to address the disparity in size between the comparables and the subject, a size adjustment was applied to each land sale.

Comparable Weighting

A weighting process is utilized to acknowledge the most applicable (reliable) of the comparables. Heaviest weight was placed on Comparable land sale 1 in determining the subject's unit value due to its location within the subject's immediate subdivision and secondary weight was placed on Comparable land sales 2, 3 and 4.

PART IV – EXHIBITS AND ADDENDA

ASSUMPTIONS AND LIMITING CONDITIONS

The research, analysis, and value conclusions contained in this appraisal are guided and influenced by the following assumptions and conditions, and constitute the framework of our study.

- No responsibility is assumed for matters legal in character or nature. No opinion is rendered as to title, which is assumed to be good and marketable. All existing liens, encumbrances, and assessments have been disregarded, unless otherwise noted, and the property is appraised as though free and clear, having responsible ownership and competent management.
- Legal descriptions referenced in the report were obtained from public documents from the State of Hawaii, Bureau of Conveyances, or were furnished by the client or other third-party, and were assumed to be correct.
- It is assumed that all applicable zoning and use regulations and restrictions have been complied with, unless a nonconformity has been stated, defined, and considered in this appraisal report.
- It is assumed that all required licenses, certificates of occupancy or other legislative or administrative authority from any local, state, or national governmental or private entity or organization have been or can be obtained or renewed for any use on which the value estimates contained in this report are based.
- It is assumed that the utilization of the land and improvements is within the boundaries or property lines of the property described and that there is no encroachment or trespass unless otherwise stated in this report. Responsible ownership and competent property management are assumed unless otherwise stated in this report.
- The Appraiser has viewed, as far as possible, the land and the improvements; however, it was not possible to personally observe conditions beneath the soil or hidden structurally or by other components. The appraisal assumes that there are no hidden, unapparent, or apparent conditions of the property site, subsoil, or structures or toxic material which would render it more or less valuable. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist.
- The appraiser is not qualified to detect hazardous waste and/or toxic materials. Any comment by the appraiser that might suggest the possibility of the presence of such substances should not be taken as confirmation of the presence of hazardous waste and/or toxic materials. Such determination would require investigation by a qualified expert in the field of environmental assessment. The presence of substances such as asbestos, urea-formaldehyde foam insulation, or other potentially hazardous materials may affect the value of the property. The appraiser's value estimate is predicated on the assumption that there is no such material on or in the property that would cause a loss in value unless otherwise stated in this report. No responsibility is assumed for any environmental conditions, or for any expertise or engineering knowledge required to discover them. The appraiser's descriptions and resulting comments are the result of the routine observations made during the appraisal process.
- All engineering is assumed to be correct. Any plot plans and illustrative material in this report are included only to assist the reader in visualizing the property. Any sketch in this report may show approximate dimensions and is included to assist the reader in visualizing the property. Maps and exhibits found in this report are provided for reader reference purposes only. No guarantee as to accuracy is expressed or implied unless otherwise stated in this report. No survey has been made for the purpose of this report.
- Information provided by the client, property owner, owners' representative, or persons designated by the client or owner to supply said information are accurate and correct unless otherwise specially noted in the appraisal report. Additionally, information from third parties including government agencies, financial institutions, realtors, buyers, sellers, and others and contained in this report were obtained from sources considered reliable and believed to be true and correct. However, no warranty is assumed for possible misinformation.

- If analysis contained in this appraisal involve partial interests in real estate, the value of the fractional interest plus the value of all other fractional interests may or may not equal the value of the entire fee simple estate considered as a whole.
- Unless otherwise stated in this report, the subject property is appraised without a specific compliance survey having been conducted to determine if the property is or is not in conformance with the requirements of the Americans with Disabilities Act. The presence of architectural and communications barriers that are structural in nature that would restrict access by disabled individuals may adversely affect the property's value, marketability, or utility.
- Possession of this report, or a copy thereof, does not carry with it the right of publication. It may not be used for any purpose by any person other than the party to whom it is addressed without the written consent of the appraiser, and in any event, only with proper written qualification and only in its entirety.
- The Appraiser(s) or those assisting in preparation of the report will not be asked or required to give testimony in court or hearing because of having made the appraisal, in full or in part, nor engage in post appraisal consultation with client or third parties except under separate and special arrangement and at additional fee. If testimony or deposition is required because of subpoena, the client shall be responsible for any additional time, fees, and charges regardless of issuing party.
- Neither all nor any part of the contents of this report (especially any conclusions as to value, the identity of the appraiser, or the firm with which the appraiser is connected) shall be disseminated to the public through advertising, public relations, news sales, or other media without prior written consent and approval of the appraiser.
- The appraiser will not disclose the contents of this appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and/or applicable federal, state or local laws.
- Acceptance of, and/or use of this appraisal report by client or any third party constitutes acceptance of the ACM Consultants, Inc., Certification and Limiting and Contingent Conditions. Appraiser liability extends only to stated client, not subsequent parties or users of any type, and the total liability of Appraiser(s) and firm is limited to the amount of fee received by Appraiser.

19.30A.010 Purpose and intent.

- A. Purpose. The purpose of the agricultural district is to:
1. Implement chapter 205, Hawai'i Revised Statutes, and the goals and policies of the Maui County general plan and community plans;
 2. Promote agricultural development;
 3. Preserve and protect agricultural resources; and
 4. Support the agricultural character and components of the County's economy and lifestyle.
- B. Intent. It is the intent of this chapter to:
1. Reduce the land use conflicts arising from encroachment of nonagricultural uses into agricultural areas;
 2. Mitigate rising property values of farm lands to make agricultural use more economically feasible;
 3. Discourage developing or subdividing lands within the agricultural district for residential uses, thereby preserving agricultural lands and allowing proper planning of land use and infrastructure development;
 4. Discourage establishment of nonagricultural subdivisions;
 5. Ensure that the rezoning of land from the agricultural district shall be open for public debate and in the overall public interest, as evidenced by conformance with the Maui County general plan and community plan land use designations and policies, State land use law, this chapter and good planning practices; and
 6. Notify the public that lands within the agricultural district are used for agricultural purposes. Owners, residents, and other users of such property or neighboring properties may be subjected to inconveniences, discomfort, and the possibility of injury to property and health arising from normal and accepted agricultural practices and operations. Such normal and accepted agricultural practices and operations include but are not limited to noise, odors, dust, smoke, the operation of machinery of any kind, including aircraft, and the storage and disposal of manure. Owners, occupants, and users of such property or neighboring properties shall be prepared to accept such inconveniences, discomfort, and possibility of injury from normal agricultural operations. (Ord. 2749 § 3 (part), 1998)

19.30A.020 District criteria.

Agricultural lands that meet at least two of the following criteria should be given the highest priority for retention in the agricultural district:

- A. Agricultural Lands of Importance to the State of Hawai'i (ALISH);
- B. Lands not classified by the ALISH system whose agricultural land suitability, based on soil, topographic, and climatic conditions, supports the production of agricultural commodities, including but not limited to coffee, taro, watercress, ginger, orchard and flower crops and nonirrigated pineapple. In addition, these lands shall include lands used for intensive animal husbandry, and lands in agricultural cultivation in five of the ten years immediately preceding the date of approval of this chapter; and
- C. Lands which have seventy-five percent or more of their boundaries contiguous to lands within the agricultural district. (Ord. 2749 § 3 (part), 1998)

19.30A.030 District standards.

Except as otherwise provided in this chapter, the following district standards shall apply for uses, facilities and structures in the agricultural district:

- A. Minimum lot area: two acres;
- B. Minimum lot width: two hundred feet;

- C. Minimum yard setbacks: front yards, twenty-five feet; side and rear yards, fifteen feet;
- D. Maximum developable area: ten percent of the total lot area. This restriction shall apply to farm dwellings, but shall not apply to any structure or portion thereof which is used to support agriculture, including but not limited to storage facilities, barns, silos, greenhouses, farm labor dwellings, and stables, and shall not apply to utility facilities as permitted by this chapter.
- E. Maximum height limit: Unless otherwise provided for in this chapter, the maximum height of any dwelling shall be thirty feet, except that vent pipes, fans, chimneys, antennae and solar collectors on roofs shall not exceed forty feet. Any non-dwelling structure such as a barn or silo that is over thirty-five feet in height shall be set back one additional foot for each foot in structure height;
- F. Maximum wall height: Walls shall not exceed four feet within the yard setback area as measured from the finished or existing grade, whichever is lower, to the top of the wall as defined herein. This does not preclude constructing fences on the top of the wall for safety purposes. The director of public works and waste management may permit greater heights of walls as needed to retain earth, water or both for health and safety purposes;
- G. The maximum number of lots that may be created from a lot, or portion thereof, that is in the agricultural district shall be based on the gross area of the subject lot, which for the purposes of this subsection shall be the tax map key parcel as certified by the real property tax division on March 1998, as follows:

Area of lot (in acres)	Maximum number of permitted lots: 2-acre minimum lot size	Maximum number of permitted lots: 15-acre minimum lot size	Maximum number of permitted lots: 25-acre minimum lot size	Maximum number of permitted lots: 40-acre minimum lot size
Area of lot (in acres)	7			
At least 31 but less than 61	7, plus one additional lot for each 10 acres above 31 acres			
At least 61 but less than 92	10, plus one additional lot for each 15 acres; plus	1		
92+	12, plus one additional lot for each 40 acres above 92 acres (not to exceed 14 lots); plus	2, plus one additional lot for each 60 acres above 92 acres; plus	1, plus one additional lot for each 100 acres above 92 acres; plus	one for each 160 acres above 92 acres

For the purposes of this subsection, any lot(s) or portions(s) thereof that is contained entirely within the subject lot, and that is owned by the same persons or related corporate entities as the subject lot, shall be considered a part of the subject lot and shall count towards the maximum number of permitted lots that may be created from the subject lot.

This subsection shall not apply to any lot which received preliminary subdivision approval prior to the effective date of the ordinance codified in this chapter and which receives final subdivision approval after the effective date of said ordinance.

The subsequent lots resulting from such subdivision shall be subject to this subsection. (Ord. 2749 § 3 (part), 1998)

19.30A.040 Limitations on resubdivision.

- A. Following the effective date of this the ordinance codified in this chapter:

 2. The subdivider shall allocate the maximum number of lots that can be created between the original lot and any new lot created as a result of the subdivision;
 3. The allocation of lots shall be recorded with the bureau of conveyances; and

- B. The following subdivisions shall not reduce the gross "area of lot" nor the "maximum number of permitted lots" as provided by subsection 19.30A.030.G:
1. Any subdivision requested by a public agency or public utility company for a public purpose;
 2. Any consolidation and resubdivision in which no additional developable lots, as defined by section 18.04.123, Maui County Code, are created, provided that this would not result in the potential to create any additional lots than could have been created prior to consolidation and resubdivision;
 3. Any subdivision for purposes of providing an easement exclusively for the protection of sites of cultural and historic significance; greenways; protection of sensitive environmental areas such as wetlands, streams, and endangered species habitat; and easements for public access to shoreline and mountain areas; or
 4. Any subdivision for purposes of providing a roadway easement or lot
- C. If the original lot has been subdivided into the maximum number of lots permitted pursuant to this chapter, additional lots may be created for family members as described in subsections 18.20.280.B.1 and 18.20.280.B.2, Maui County Code, whether or not a deferral of improvements is intended, with the approval of the council; the application for such additional lots shall be processed in the same manner as applications for conditional permits, as provided by chapter 19.40, Maui County Code.

D. No deed, lease, agreement of sale, mortgage or other instrument of conveyance shall contain any covenant or clause which restricts, directly or indirectly, the operation of agricultural activities on lands within the agricultural district. FLOOD HAZARD ASSESSMENT TOOL/LAYER LEGEND

(Note: Legend does not correspond with FEMA)

SPECIAL FLOOD HAZARD AREAS (SFHAs) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD - The 1% annual chance flood (100-year), also known as the base flood, is the flood that has a 1% chance of being equaled or exceeded in any given year. SFHAs include zone A, AE, AH, AO, V, and VE. The Base Flood Elevation (BFE) is the water surface elevation of the 1% annual chance flood. Mandatory flood insurance purchase applies to these areas.

	Zone A: No BFE determined.
	Zone AE: BFE determined.
	Zone AH: Flood depths of 1 to 3 feet (usually areas of ponding); BFE determined.
	Zone AO: Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined.
	Zone V: Coastal flood zone with velocity hazard (wave action); no BFE determined.
	Zone VE: Coastal flood zone with velocity hazard (wave action); BFE determined.
	Zone AL: Floodway areas in Zone AE. The floodway is the channel of stream plus any adjacent floodplain areas that must be kept free of encroachment so that the 1% annual chance flood can be carried without inundating the BFE.

NON-SPECIAL FLOOD HAZARD AREA - An area in a low to moderate risk flood zone. No mandatory flood insurance purchase requirements apply, but coverage is available in participating communities.

	Zone X5 (X-shaded): Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot, or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood.
	Zone X6: Areas determined to be outside the 0.2% annual chance floodway.

OTHER FLOOD AREAS

	Zone D: Inundated areas where flood hazards are undetermined, but flooding is possible. No mandatory flood insurance purchase applies, but coverage is available in participating communities.
