Subject: Makila development

Committee members,

We built a home and farm in Launiupoko in 2017/2018. We chose this area because of the ag zoning, we enjoy this beautiful neighborhood. The spacious lots and farms is what we felt Hawaii should be all about. In the short time we have lived here, we have watched traffic come to a crawl all hours of the day all originating at Kai Hele Ku. This intersection of the bypass is the starting point to both slow downs north and south bound traffic. I can not imagine additional traffic coming on from Kai Hele Ku!

We moved in January of 2018, our beautiful farm of citrus trees and banana plants. One month later, we were told the Ag water will be diverted and the reservoir and streams were dry. This situation continues today.

I believe affordability in housing, but it has to be in an area with adequate resources, sewers and water. Better access to highways, putting more vehicles on the bypass will be more disastrous then it already is.

Please vote no to this rezoning! Leave our beautiful neighborhood a place it was originally planned. Mahalo
