Subject: Consider the impact

Aloha,

I am supportive of affordable housing. I do feel that when considering these projects, that all three projects should be looked at as it will dramatically cause traffic issues, etc. Water is another issue. A family of four uses 400 gallons of potable water per day (100 gallons per person according to USGS estimates). 500 new homes would use 200,000 gallons of potable water per day, 6,000,000 gallons per month. Water is in short supply so we need to really consider where the supply will come from.

Trying to turn south onto the bypass can sometimes take 10-15 minutes. Adding 600-700 cars per day to that will cause major delays.

I would ask that we limit the number of homes to less than one hundred, or something reasonable.

Mahalo,
Roger
