Mr. Tivoli Faaumu, Chief
Department of Police
County of Maui
Wailuku, Hawaii 96793

Dear Chief Faaumu:

SUBJECT: **ROADWAY SAFETY** (MT-10(8))

At its meeting of September 30, 2019, the Multimodal Transportation Committee discussed the effects of liquor and drug use on drivers accounting for 66 percent of traffic fatalities on Maui's roadways.

The Committee also referred to the attached proposed State bill entitled "A BILL FOR AN ACT RELATING TO THE USE OF INTOXICANTS WHILE OPERATING A VEHICLE." The purpose of the proposed State bill is to lower the threshold of blood alcohol concentration from 0.08 to 0.05 for the offense of operating a vehicle while under the influence of an intoxicant.

The Hawaii State Association of Counties ("HSAC") Executive Committee will be discussing the proposed legislation, along with a number of other statewide initiatives submitted by Maui County Council, for possible inclusion in the 2020 HSAC Legislative Package at its meeting on October 10, 2019 at 10 a.m. at Honolulu Hale.

May I please request you submit a letter of support to the HSAC Executive Committee **no later than Thursday, October 10, 2019 at 9 a.m.** referencing the proposed bill. Similar support letters are also being requested from State Department of Transportation, Mothers Against Drunk Driving, Maui Nui Youth Council, and Maui Coalition for Drug-Free Youth. Representatives from these organizations attended the September 30th Committee meeting and verbally expressed support.

____.B. NO.____

A BILL FOR AN ACT

RELATING TO THE USE OF INTOXICANTS WHILE OPERATING A VEHICLE.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF HAWAII:

1 SECTION 1. The legislature finds that in 2013, the
2 National Transportation Safety Board recommended that all fifty
3 states adopt a Blood Alcohol Concentration (BAC) cutoff of 0.05
4 compared to the 0.08 standard. According to the National
5 Transportation Safety Board, lowering the rate to 0.05 would
6 save about five hundred to eight hundred lives annually.

7 According to the National Transportation Safety Board, a
8 driver with a BAC of 0.05 would be affected by exaggerated
9 behavior, loss of small-muscle control and eye focus, impaired
10 judgment, lowered alertness, and release of inhibition. This
11 would result in reduced coordination, reduced ability to track
12 moving objects, difficulty steering, and reduced response to
13 emergency driving situations.

14 The legislature further finds that lowering the threshold
15 of BAC cutoff to 0.05 would save lives, prevent catastrophic
16 injuries, and decrease medical costs.
