Subject: Please Deny Lihau'ula 201H unaffordable housing project in Olowalu

This project will not help the sustainability of the island nor help the people have better lives. There will be SMA violations for this project. There should be an EIS to protect the reef and ocean quality and to confirm a reliable potable water source for the project. There are already SMA violations for Affordable housing in Lahaina as the project was pushed through without proper review and mitigation for public resources.

I understand the County trying to push housing projects through for property revenues but lack the foresight as to the long term harmful effects that are sure to happen.

Mahalo nui, Linda Lyerly. 100 Hoku Pl., Lahaina, HI 96761
