Subject: Lihau'ula 201H

Aloha mai kākou,

I am writing to express my opposition to the Lihau'ula 201H housing project. Olowalu is home to one of our last pristine coastline areas. The runoff from this project both while in construction and occupied phases will be detrimental to the survival of this beautiful eco system. Fishing and gathering, both practiced in Hawaiian culture will be heavily impacted by the long term effects of a housing development across the street. Aside from the obvious reasons of traffic, and waste in this already fragile area. Olowalu, which to my understanding, is not zoned for such a large living community. What will the long term effects to this valuable space be? It is also stated to be an "affordable housing" community, with the cheapest home in the \$500,000.00 range. Anyone who considers this to be affordable is clearly not in the majority bracket of local residents.

Again, I strongly strongly OPPOSE the approval of this project. Please leave this 'āina available for future generations to enjoy. Many of whom are spending their weekends already in this wahi learning the practices of our kūpuna.

Me ka mahalo nui,
Misha Lococo
