Importance: High

Mahalo for inviting me to your committee meeting yesterday afternoon.

To follow up on your request for information, I checked with DOT Airports Division. Unfortunately, we are not privy to data containing the number of passengers for future flights.

From what I was told, because flights are scheduled, those interested could, through research, get a base idea of what flights (& equipment) are heading this way, so they can do some back of the envelope rough estimate calculations. The attached cheat sheet shows aircraft equipment typically flown by the respective airlines to/ within Hawaii, the max/ min passenger loads, and the airport pairs.

These three sites give real time flight/ ground ops status information:

- <https://www.flightradar24.com> - provides the most detailed info on aircraft & schedule of all
- <https://flightaware.com/live/>
- <https://www.flightview.com/>

Should you have any other questions, please do not hesitate to contact me.

Mahalo!

Lynn Araki-Regan
Deputy Director – Administration
