Maui Youth & Family Services

The Nuances of Homelessness

- Those with financial challenges: the working poor; recently laid off; escaping domestic violence; recently divorced; or other life changes.
- Those with substance abuse and/or behavioral health issues.
- Those that want to live outdoors/unencumbered.
- Those that move to Maui; were previously homeless or close to homeless elsewhere.

How we impact Those with substance abuse and/or behavioral health issues.

- Provide immediate housing, food and medical care.
- Through detoxification services.
- Through crisis support services.
- Through substance abuse treatment and behavioral health counseling.
- Address issues that may lend themselves to homelessness.
- Address issues that may be generated by homelessness.
- Provide extended housing options through Sober Living Program.

How We Work

- Client receives help through a Crisis Mobile Outreach staff member or MMMC nursing or psychiatric staff.
- Client may come in to LCRS or Detox Program.
- Client may be referred by staff at MCCC.
- Client may then move in to Residential Treatment.
- Client may be self-referred to Residential Treatment.
- Client may go on to live in Sober Living Program home.

As a client progresses through these steps we are able to provide a continuum of care over a period of time.

How We Work

During this period client will receive appropriate treatment and support:

Detox support.

Crisis intervention and stabilization.

Substance abuse treatment.

Mental health treatment.

Support services.

Skill building.

Food, housing and job placement.

This support can last from a week to a year, and longer.

What We Need to Better Address Homelessness

- Improve and expand our Sober Living Program by adding a specific behavioral health approach and qualified staff person ~\$100,000/year.
- To establish more Sober Living Homes via Affordable Housing funds or other means
- To fully utilize our existing services without generating debt to other programs ~\$250,000/year
- Expand our Residential Treatment Program by adding an additional dorm facility
 - ~\$205,000 design & consulting
 - ~\$950,000 construction, permitting, sitework. etc.
