# Multi-Sport Court Concerns

- Courts will no longer be sanctioned.
- Overlapping of lines may cause confusion.
- Conflicts between the different sport groups.

LOG IN

---

Do colleges allow blended lines on their courts? ^

---

Yes. The ITA (Intercollegiate Tennis Association, the governing body of men's and women's collegiate tennis) Division I Operating committee has taken the lead in revising this regulation and in embracing 36' and 60' tennis.

Approved on 5/24/2010, the revised ITA Court Regulation states, "The playing surface shall be of hard court construction, designed specifically for tennis, and coated with a recognized tennis surface. The only lines on the playing surface shall be standard tennis court lines, including USTA approved 36' and 60' blended lines within the same color family as the interior court."

Are courts with blended lines authorized for professional play? v

Are courts with blended lines authorized for professional play? ^

---

Currently, courts with permanent blended lines and standard line markings are authorized for professional play by the ITF for both Men's and Women's \$15,000 and \$25,000 events. However, ITF Women's \$60,000, \$80,000 and \$100,000, as well as ATP Challengers, are not allowed to have blended lines. Courts with permanent blended lines may be used as practice courts only at these events. To host a USTA Pro Circuit event, you must maintain an adequate number of match play courts according to the draw size of the event.

# Community Support

From:  
South Maui Pickleball Players  
Waipuilani Park

## Thank You!

We're writing to thank the Department of Parks and Recreation for continuing to support pickleball players in South Maui, in this case by providing porta-potties next to the pickleball courts at the Waipuilani Park.

We'd also like to recognize Cody Tesoro, District Supervisor, for his openness in engaging with our player community about potential facility improvements, and helping us understand department priorities and procedures.

As pickleball has grown in popularity in the local community, an increasing number of players are taking advantage of the courts at Waipulani. It's not unusual to have 20 - 30 players using the courts over a typical morning.

Because pickleball can be enjoyed at all ages, an increasing number of local families are playing, sometimes with three generations of children, parents, and grandparents enjoying the courts. The porta-potties will definitely make it easier for families to have a comfortable and enjoyable outing in the park.

We recognize that facility improvements that seem simple have implications for park budgets, operations, and maintenance. We appreciate the Department's recognition of the growth of pickleball in South Maui, and its efforts to continue to support players here.

With thanks:
